Frozen fruits and vegetables are frozen and packaged at low temperatures after being harvested, washed, blanched, and cut. The freezing technique helps in long-term preservation and retains the original flavor, color, texture and nutritional value of fresh products. Frozen fruits and vegetables are commonly processed in sliced, raw, pureed, and cubed forms. As compared to their fresh counterparts, these products offer various benefits, such as quicker preparation time, low cost and easy availability during off-season.

The rising consumption of ready-to-eat food products is primarily driving the global frozen fruits and vegetable market. In line with this, the escalating demand for seasonal fruits and vegetables throughout the year is acting as another major growth-inducing factor. Furthermore, rising health consciousness and awareness about the nutritional value of frozen fruits and vegetables amongst consumers is fueling the market growth. Rapidly improving cold storage chains are

leading to a smooth and systematic supply of frozen fruits and vegetables across the globe, which, in turn, is propelling the market growth.
