

Snack Pellets Market Scope, Key Report Coverage, Demand and Supply Analysis, Business Opportunities By 2026

The global Snack Pellets market was worth USD 1.97 Billion in 2018 and is expected to reach USD 2.94 Billion by year 2026, at a CAGR of 5.1%.

NEW YORK CITY, NEW YORK, USA,
March 3, 2022 /EINPresswire.com/ --

According to the current analysis of Reports and Data, the [Snack Pellets Market](#) was valued at USD 1.97 Billion

in 2018 and is expected to reach USD 2.94 Billion by year 2026, at a CAGR of 5.1%. With rapidly changing consumer lifestyles, the demand for processed and convenience foods is rising. The increase in disposable incomes is further boosting the consumer spending on food consumption and establishing a healthy snacking trend in the market.

This document gives the latest information on the ongoing COVID-19 pandemic and its aftermath. The coronavirus pandemic has massively affected every aspect of the global industry and has resulted in various changes in the market scenario. The ever-evolving business landscape and the initial and future assessment of the impact are also examined in the report. The report discusses the significant aspects of the market and includes expert opinions on the current status, along with historical data.

Snack pellets have a longer shelf life and promise enhanced nutritive value in comparison to other conventional processed snacks. Moreover, market players are experimenting with and introducing new flavours and textures of snacks that come with nutritional claims. They are gradually penetrating the densely populated markets of Asia Pacific and Latin America, to exploit the heavy demand for ideal snacks in the region. However, despite favourable growth scenarios in most regions, this market is expected to face difficulties due to operational complexities during food processing and a deficient transport system in some developing regions.

Key Players:

Intersnack Group GmbH and Co. KG, J.R. Short Milling, Limagrains Cereals Ingredients, Mafin,

Further key findings from the report suggest-

The multigrain category under the type segmentation is the most prominent within the market. The segment is growing because of rising consumer focus on healthy snacking and low-fat content in snacks.

By form, the gelatinized segment held the largest market share in 2018. It is expected to dominate the market because of its benefits over other forms of pellets, such as a uniform thickness.

The die-face segment is expected to record the fastest growth during the period of forecast. The reason behind the fast-paced growth is the scope of diversity and creativity in offering new shapes and textures to snacks.

By technique, the single-screw extruder segment is expected to register the largest share in this market. Single screw extruders enable production of complex extruded snack food products, that are witnessing a high demand.

The twin-screw extruder segment is expected to register a modest rate of growth due to increasing applicability and enhanced technical ability to produce different shapes of snack pellets.
