Further key findings from the report suggest:

Soy protein isolates segment is expected to reach USD 5.3 billion by the year 2026, showing the highest growth during the forecast period. Soy protein isolates are used for moisture retention and for enhancing the texture of food products.

Soybeans contain all the essential amino acids that are necessary for human nutrition and have been produced and harvested for thousands of years. People with diets high in soy protein and low in animal protein have lower risks of prostate and breast cancers than other populations.

Soy protein ingredients market products are sources of isoflavone for functional foods. Highest isoflavone content is found in hypocotyl flours, tofu, and cooked soybeans. Isoflavones are phytoestrogens that are dietary supplements and serve as raw materials to many food preparations. Their consumption helps maintain blood vessel health.

Soy grits are high protein high fiber, coarsely grounded toasted soybean. They find applications in improving the consistency of baked goods and serve as excellent cereals that provide a nutty flavor

Cereal blends are also called as soy fortified blended foods. It consists of cereal grains like wheat, corn, etc. and 10-30% of soy grits or soy flour. These low-cost nutritious foods are gaining popularity in Western countries and drive demand for soy protein ingredients market

The North American regional segment dominates the soy protein ingredients market with the U.S holding the largest share of the regional market followed by Canada and Mexico. The growth can be attributed to changing lifestyles, lack of balanced diet intake and introduction of novel products enriched with nutritional contents
