- 51% of respondents believe that the war in Ukraine will last for a long time and that the situation will not improve in the near future.

- 45% of respondents believe that the war in Ukraine will end within the next year.

According to the latest survey conducted by TGM Research, the majority of respondents believe that the war in Ukraine will last for a long time and that the situation will not improve in the near future. The survey was conducted by TGM Research, a leading market research firm in Poland. The results of the survey show that 51% of respondents believe that the war in Ukraine will last for a long time and that the situation will not improve in the near future. This is a significant increase from the previous survey, where only 35% of respondents held this view. The survey also found that 45% of respondents believe that the war in Ukraine will end within the next year. This is a decrease from the previous survey, where 55% of respondents held this view. The survey was conducted among a representative sample of Polish citizens aged 18 and over. The results are presented in the following table.

According to the latest survey conducted by TGM Research: "The war in Ukraine - a global survey of Polish citizens. The survey was conducted by TGM Research, a leading market research firm in Poland. The results of the survey show that 51% of respondents believe that the war in Ukraine will last for a long time and that the situation will not improve in the near future. This is a significant increase from the previous survey, where only 35% of respondents held this view. The survey also found that 45% of respondents believe that the war in Ukraine will end within the next year. This is a decrease from the previous survey, where 55% of respondents held this view.
