

# Digital Human Avatar Market Research, Emergen Types by Key Players, Type and Application, Future Growth to 2028

*Growth of healthcare sector*

VANCOUVER, BC, CANADA, March 6, 2022 /EINPresswire.com/ -- A recent market intelligence study on the [Digital Human Avatar market](#) incorporates proprietary techniques and assessment tools to screen the Digital Human Avatar market for the forecast period. Additionally, valuable insights pertaining to the market size, share and growth rate of Digital Human Avatar market offers a greater chance of success for all – business owners, products, and innovative technology. Unbiased perspective on present day and yesteryear trends included in the research aims at saving the product owners from making wrong business decisions.

Emergen Research Logo

The global digital human avatar market size is expected to reach USD 527.58 Billion in 2030 and register a revenue CAGR of 46.4% over the forecast period, according to latest analysis by Emergen Research. Robust global digital human avatar market revenue growth can be attributed to increasing efforts by customer-centric firms to provide emotionally engaging experience to customers. Integration of conversational intelligence of virtual human avatar enables possibility of a scalable interaction between a human being and the avatar, thus allowing directed approach to understand a customer's needs. Digital human avatars are capable of conversing with customers through text or speech to offer product recommendations. Also, these avatars can help visitors to navigate across a product catalog and proactively mimic a sales person by initiating a conversation in any languages, and subsequently understand consumer preferences via their replies on basis of prebuilt algorithm, in order to provide suitable responses to a customers' queries.

For further granularity, the study digs deep into aspects such as market segmentation, key driving forces, opportunities and threats for the forecast period of 2021-2028. To help business strategists strengthen their strategic planning and execute a plan to maintain and gain a competitive edge, the research weighs up on buyer preferences, gross margin, profit and sale across different regions. Strong focus on financial competency, strengths, and weaknesses of the companies and recent acquisition and merger speaks a lot about the future adjacencies around the core business due to the ongoing development in the Digital Human Avatar market.

Top Companies Operating in the Digital Human Avatar Market and Profiled in the Report are:

UneeQ, Microsoft Corporation, Didimo Inc., Wolf3D, HOUR ONE AI, Spatial Systems, Inc., CARV3D, DeepBrain AI, Soul Machines, and Synthesia Ltd.

### Key Highlights From the Report

Among the product type segments, the interactive digital human avatar segment is expected to register faster revenue CAGR over forecast period. Live human agents, who follow a standard set of queries, are more likely to struggle at forming an interactive environment in terms of personalized approach in comparison to virtual agents, who understand and learn customer behavior in real-time and based on customer inputs, rapidly adapt to create a completely personalized approach to each customer.

Also, other than interacting with customers through tailored queries and replies, digital human avatars can create a personalized consumer specific algorithm for learning the patterns of their selections and choices. Moreover, businesses can deploy these avatars for online training and learning of their staffs.

Among the industry vertical segments, IT & telecommunications segment revenue is expected to register a rapid growth rate over the forecast period. Rising demand for better connectivity services and emergence of 5G technology are key for growth of companies in the telecom sector.

However, contact centers are facing immense pressure and are struggling to scale as required. Also, automated technologies such as chatbots that are scalable are unable to replicate crucial human touch in providing customer experience. Thus, customers are experiencing digital fatigue to the point where about 82% of them rather want to talk to a person. Digital human avatars deliver a more human-like experience to customers, enabling telecom firms to scale the human touch, as well as allow human staff to focus on other important tasks.

It further offers a comprehensive coverage of the strategic alliances such as mergers and acquisitions, joint ventures, collaborations, product launches, brand promotions, and partnerships, among others. Key strategic alliances for product development and advancements

is expected to add traction to market growth going ahead. The report also covers an in-depth analysis of the key competitors of the market along with their growth strategies and business expansion plans.

Regional analysis of the Digital Human Avatar market includes analysis of the production and consumption ratio, supply and demand dynamics, regional trends and growth drivers, growth prospects, presence of key manufacturers and vendors, and market size and share in key regions such as North America, Latin America, Europe, Asia Pacific, and Middle East and Africa. The report further offers key insights into country wise analysis and major factors driving revenue growth of each regional market.
