

# SAVAVET division of SAVA Healthcare Limited launches ORAPET, the first probiotic dental drops for cats and dogs in India

*SAVAVET division of SAVA Healthcare Limited launches ORAPET, the first probiotic dental drops for cats and dogs in India*

PUNE, INDIA, April 17, 2022 /EINPresswire.com/ -- [SAVAVET](#), a division of [SAVA Healthcare](#) Limited

“

This launch further demonstrates SAVA's commitment to providing innovative treatment modalities in safeguarding, extending and improving lives of companion animals.”

*Vinod Ramchandra Jadhav*

announced the launch of [ORAPET](#), a radical new treatment modality to promote healthy gums, teeth, mouth and breath in cats and dogs. ORAPET contains 3 clinically validated probiotic bacterial strains that help in all stages of periodontitis and offers veterinarians and pet parents, a significantly easy method to fight dental diseases.

“The launch of ORAPET further expands the brand portfolio of SAVAVET that is unique and differentiated. ORAPET will help in significantly improving oral hygiene of pets in India. This launch further demonstrates SAVA's

commitment to providing innovative treatment modalities in safeguarding, extending and improving lives of companion animals.” said Vinod Ramchandra Jadhav, Chairman of SAVA Healthcare .

“Conventional techniques may do more harm than good. They may cause damage to the dental architecture and imbalance in oral microflora”, he further added.

Oral health of pets determines their overall health. SAVAVET is present across multiple therapy areas already and with the launch of ORAPET, it adds another important therapy area to its product offering, namely oral health.

## About ORAPET

ORAPET is a probiotic dental drops for cats and dogs containing 3 clinically validated probiotic bacterial strains - Lactobacillus helveticus R52, Lactobacillus rhamnosus R11, and Bifidobacterium longum R175.

Each 0.25ml of ORAPET contains 1bn CFUs of these three probiotic bacteria.

The probiotic bacteria help to maintain a healthy oral microflora & supports oral health & hygiene.

The American Veterinary Dental Society estimates that 70% of cats and 80% of dogs suffer from some form of gum disease by the time they are 2 to 3 years old.

Oral care in pets is done using traditional techniques like mechanical action (brushing), antimicrobial products such as mouthwash and dental chews like bones. However, these products destroy the whole oral flora, leaving space for harmful bacteria to colonize. Most dental diseases in dogs and cats occur below the gum line.

ORAPET is unique formula of 3 clinically validated probiotic bacterial strains that promotes healthy oral hygiene
