There is no denying that robots are becoming daily assistants in the hotel industry and appearing in hotels and restaurants across the world. Robots are also utilized in hotels, restaurant, & bar for housekeeping, cleaning, and delivering food items to guest rooms. Furthermore, these robots are also programmed to accept order, prepare meals and drinks for customers. Thus, growing advancement in the hospitality robots market and increasing utility of robots in hotel, restaurants, and bars are expected to accelerate the growth of the hospitality robots market during the forecast period.

The COVID-19 pandemic resulted in a positive impact on the hospitality robots market. Attributed to this pandemic, not only service robots but also disinfection robots are gaining considerable popularity among hospitality services providing companies. Many countries have opened their borders to welcome people. The tourism industry is speeding up again. Many hotels provide guests with a quarantine period. Due to lack of personnel, hotels are looking for a complete robot solution for the hotel. Various hospitality robots can be deployed in the hotel according to their use and purpose, such as luggage robots, room service robots or room delivery robots, carpet vacuuming robots, check-in robots, and children's entertainment robots or children's play robots, and now the popularly used disinfection robots.

Rapid growth of the hospitality and travel & tourism industry and adoption of robotic automation in hotels, restaurant, bar, and event industries are majorly boosting the growth of the market during the forecast period. Furthermore, increase in concern for hotel premises; safety and rise in utility of the robots in hotel, events, and restaurants are spurring the growth of the market during the forecast period. Various hospitality robots are programmed for special purpose and unique allocated task according to the conditions and situation, and these robots are manufactured according the requirements of the clients. For instance, Pepper, a humanoid robot developed by SoftBank Robotics, wore a mask, greeted new guests in the lobby, and reminded them to wear a mask. Pepper is also programmed to deliver exciting messages, such as "I hope he feels good as soon as possible", and more serious, "I pray that social distancing and vaccination will stop the spread of the disease as soon as possible", and more mysterious messages "Let us unite and overcome this together. Thus, advancement in robots and availability of customizations option so as end users can use robots according to their purpose and situations are expected to drive the growth of the product market during the forecast period.

The players operating in the hospitality robots industry have adopted product launch and business expansion as their key developmental strategies to expand their market share, increase profitability, and remain competitive in the market. The key players profiled in this report include Savioke, Connected Robotics, BotsAndUs, Travelmate Robotics, Hyundai Robotics Co., Ltd, Knightscope, Inc, Maidbot, Aethon Inc., Softbank Robotics, and Ubtech Robotics, Inc...

### Key findings of the study

The hospitality robots market size was valued at \$295.3 million in 2020 and is estimated to reach \$3,081 million by 2030, registering a CAGR of 25.5% from 2021 to 2030.

In 2020, depending on type, the front desk robots segment was valued at \$151.8 million, accounting for 51.4% of the global hospitality robots market share.

In 2020, depending on end user, the travel and tourism industry segment was valued at \$57.4 million, accounting for 19.4% of the global hospitality robots market share.

In 2020, depending on sales channel, the offline segment was valued at \$126.1 million, accounting for 42.7% of the global hospitality robots market.

In 2020, the U.S. was the most prominent market in North America and is projected to reach \$821.9 million by 2030, growing at a CAGR of 23.9% during the forecast period.
