COVID-19 scenario-

The outbreak of the pandemic gave way to huge disruptions in the production and manufacturing of roofing materials across the world, thereby impacting the global roofing market negatively.

However, as the situation is getting ameliorated, the market is anticipated to get back on track soon.

The bituminous segment to retain the lion's share-

On the basis of roofing material, the bituminous segment held the major share in 2020, garnering more than half of the global roofing market. The same segment is also projected to cite the fastest CAGR of 4.7% throughout the forecast period. This is because bitumen roofing is extremely long-lasting because of their great tensile strength.

The flat roof segment to dominate by 2030-

On the basis of roofing type, the flat roof segment contributed to the lion's share in 2020, holding nearly three-fourths of the global roofing market. The same segment is also projected to manifest the fastest CAGR of 4.4% from 2021 to 2030. Increase in roofing activities in the developed and developing economies fuels the segment growth.
