

# ANNOUNCEMENT ALERT FROM INDIAN GOVERNMENT TO ABROAD MEDICAL STUDENTS

*MBBS In Philippines Safe & Secure for INDIAN Students*

CHENNAI, TAMIL NADU, INDIA, March 7, 2022 /EINPresswire.com/ -- In a big relief to Foreign Medical Graduates, the National Medical Commission (NMC) has said foreign medical graduates with incomplete internships can finish the same in India. NMC stated that those foreign medical graduates who did not fall under NMC's Foreign Medical Graduate Licentiate Regulations were governed by provisions under the erstwhile Indian Medical Council Act 1956. The provisions of sub-section (3) of section 13 of IMC Act required such FMGs to complete internship in India if they have not undergone any practical training in the foreign country where they were studying.

UV Gullas College of Medicine Logo

However, NMC has now acknowledged the impact of Russian invasion on Ukraine on FMGs' future especially in terms of incomplete internship or practical training in medicine.

Considering the agony and stress faced by these FMGs, their application to complete the remaining part of internship in India is considered eligible," the NMC circular read.

The commission acknowledged that FMGs were facing hardship in getting themselves registered in some of the state medical councils after publication of Foreign Medical Graduates Licentiate Regulations 2021 and Compulsory Rotatory Medical Internship Regulations 2021 by NMC.

The Friday 4th of March 2020 circular maintained that the provisions were now not applicable for FMGs who had acquired a foreign medical degree or primary qualification before November 18, 2021, candidates who had joined undergraduate medical education in foreign colleges before November 18, 2021 as well as those specifically exempted by the union government.

NMC has now asked state medical councils to process completion of internship of these candidates provided they have cleared the foreign medical graduate examination (FMGE). NMC has also directed the state councils to ensure that no fee was charged by medical colleges from the FMGs for permitting them to do their internship even as the stipend and other facilities to these candidates were to be equivalent to Indian counterparts being trained at government medical colleges.

NMC also issued guidelines for state medical councils for allowing FMGs to undergo internship such as ensuring that the latter's medical qualification or degree was registerable to practice in their respective foreign country in which the degree was awarded. Other guidelines to the state medical councils included restricting the duration of internship to either 12 months or balance period while restricting the maximum quota for allocation of internship to FMGs to additional 7.5 per cent of total permitted seats in a medical college.

Mrs.Suba Ramesh, India's Principal Associate, recommends UV Gullas College of Medicine in the Philippines as the best medical school for Indian students interested in doing their MBBS abroad. She discusses why International Students from 16 countries chose UV Gullas College of

### MBBS IN PHILIPPINES

Do you know that more than 10,000 overseas students enroll in Philippine medical schools, with Indian students accounting for more than half of the total? Philippines universities and colleges are noted for

Their excellence, sending hundreds of doctors and engineers to work in the United States, the United Kingdom, and other developed western countries each year. According to American Physician Statistics, one out of every ten physicians in the United States attended a medical school in the Philippines.

The total cost of a medical degree in the Philippines will be between 12 to 20 lakhs Rupees. Many outstanding universities may be found in the Philippines. The Philippines has Asia's highest literacy rate of 94 percent! That suggests that in the Philippines, the majority of the population is educated.

As a result, the country is honorable and secure as a place to study medicine.

English is an international language that is spoken as a first or second language in the majority of countries throughout the world. The Philippines, as the world's third largest English-speaking

country, is not far behind. In all levels of education, including MBBS in the Philippines, English is the medium of instruction.

It is suitable for both males and females. Philippines is a melting pot of cultures, making it a welcoming country that gives students an advantage in not being considered as outsiders or foreigners. Students that study here are more relaxed due to the welcoming nature of the country and are able to concentrate better on their academics.

The Philippines is well-known for its medical research. The majority of medical universities in the Philippines have been privatized since privatization began early in the country.
