The report also includes competitor and regional analysis, and contemporary advancements in the global market.

Commercial Greenhouse Market

The global commercial greenhouse market reached a value of US\$ 29 Billion in 2020. Looking forward, IMARC Group expects the market to grow at a CAGR of 9.5% during 2021-2026. Commercial greenhouse refers to high-tech structures outfitted to produce fruits, vegetables, and flowers that require specific temperature conditions. There are two types of commercial greenhouse, namely free-standing and gutter-connected greenhouses. These structures can efficiently control various environmental factors to promote crop yield, such as humidity, temperature, ventilation, irrigation, light exposure and fertilization. In addition to this, a greenhouse is built with transparent roofs and walls to allow sunlight to pass through for photosynthesis.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Market Trends and Drivers:

The growth of the commercial greenhouse market is primarily being driven by a significant rise in the global population. This has led to the widespread adoption of commercial greenhouse to provide high yield to meet the escalating food demand. Additionally, the lack of cultivable land and unpredictable climate changes are further supporting the market growth. Moreover, the emerging trend of rooftop farming and shifting preference toward fresh and organic food products are propelling the market growth. Continuous investments in research and development (R&D) activities to introduce precision technology with environment control facilities are creating a positive outlook for the market further.
