Market Overview

The global Botanical extracts market is witnessing an uptick on account of the growing demand for natural and organic products coupled with the surging awareness about the health benefits of the plant extracts with no side effects. Plants continue to provide humans with new remedies as 50% of all drugs in clinical use in the world are derived from natural products, of which higher plants contribute 25% of the total. Also, as per the World Health Organization (WHO), around 80% of the world's population relied on medicinal plants as their primary healthcare source. Moreover, the growing application of plant extracts in the food and beverage industry to enhance flavor and color, cosmetics, and personal care products to improve textures, properties such as antioxidant and antimicrobial activities and tyrosinase inhibition effects are adding pace

to the growth of the market. Also, consumer awareness of the possible side effects of using chemical-based antimicrobial agents has forced researchers to identify and explore natural plant-based antimicrobial agents (or preservatives) that are toxicologically safe, especially when used in food applications.

COVID-19 Impact

During the COVID-19 pandemic, the demand for Botanical extracts witnessed a sharp rise. As per the CSIR study, Plant extract reduces Sars-CoV-2 viral replication lab. As per three laboratories of the government's Council for Industrial and Scientific Research, plant and root extract of velvetleaf can impact the replication of the Sars-CoV-2 virus, which causes Covid-19, by up to 98% in cell cultures.
