sector.

Sprint Data Solutions Worldwide Marketing came into the marketing industry during a transition period. Traditional marketing techniques like direct mail were dominant, but new opportunities were already beginning to show in upcoming technologies like digital marketing. However, the company's choice to focus on direct mail fortuitously taught crucial lessons about data compilation, management, and analytics. When digital marketing proved its usefulness faster than most had anticipated, the company was positioned to exploit an early mover advantage. This yielded significant performance for both the company itself and its clients.

Sprint Data Solutions Worldwide Marketing initially started with a small service range, only working within its hometown of Las Vegas, Nevada. Today, the company now has an operating range across the entire United States, including Alaska and Hawaii. Complete continental coverage is also available, with access to Canadian and Mexican markets databases. Businesses that want to go international also have options for databases across the Atlantic with access to European Union markets like France.

A Historical Decade

For many people over the age of 40, the 80s has now come to symbolize a historic decade and even a way of life in America that may no longer be possible. The middle class was at its most prosperous and comfortable. The Cold War was in full swing, with the Soviet Union as the archenemy of the United States. The economy was on an upward trajectory for seemingly everyone that has yet to be repeated. In the media, some of the most beloved pieces of entertainment appeared on both film and television, such as Star Wars, The A-Team, and other favorites.

Into this decade came Ronald Reagan, the President who would establish the precedent in

America that it was possible for people who didn't originally come from a political background to ascend into the highest positions of power. Like no other politician before him, he became a symbol of the decade; from contributing to the fall of the USSR to the Iran-Contra scandal, it's impossible to think of America in the 80s without thinking of Ronald Reagan.

A Souvenir Opportunity

[Commemorative products are always popular with people as reminders of good](#) times. In some cases, there may be more complex layers of attraction such as added "kitsch" or "ironic" value in addition to memories and nostalgia. This is almost certainly the case for some with a historical figure both as popular and controversial as Ronald Reagan, creating opportunities for the right businesses.

There is always the possibility they will be receptive to more for people who have already purchased a Ronald Reagan commemorative product. Perhaps more importantly, however, this indicates certain marketing behaviors and characteristics, such as receptivity to other retro/nostalgia products that can lead to more sales when approached adequately with the proper marketing.

Databases For The Right Customer

Sprint Data Solutions Worldwide Marketing has completed Ronald Reagan's commemorative product buyers listings. These databases are broken down by geographical requirements so that businesses can target the entire country, an individual state such as Maryland, an entire region, such as New England, or even specific cities, towns, or even neighborhoods, such as just the Castro area of San Francisco.

However, lists are also available based on demographic breakdowns. So if there's a preference for targeting specific audiences, such as only Christians, or only people of African-American descent, or a specific age group, such as only Baby Boomers born before 1965, or even particular levels of income, such as only high net worth individuals, lists for these categories can be provided. All relevant details, such as a physical address, email address, telephone number for telemarketing, and cellular numbers for text/SMS-based marketing, can also be provided.

Clients who want to manage a direct mail campaign but lack experience can try turnkey direct mail solutions. This is a carefully guided experience, taking clients through every step of the immediate mail process, from conception to design, manufacture, and finally, distribution of the materials.
