STEMPilot Announces Elementary
School 3-5 [Science](#) STEM Now Available
Waterbury, Connecticut –

STEMPilot 3-5 Science Curriculum is
now available for students in 3rd – 5th
grade science classes.

STEMPilot Classroom

“This brand new curriculum teaches elementary school students the Theory of Flight while they learn to fly a Cessna 172, using a free flight simulator on any smartphone or tablet” said Jay LeBoff, the company’s founder.

“

Elementary schools are
looking for project based
STEM learning”

Jay LeBoff

The curriculum includes animated learning videos in each unit outlining the content before the kids read the actual written words. Visual Learning First helps students understand the subject before they are challenged to read the curriculum unit, helping them to achieve

understanding and success.

“Each flight plan introduces basic geometry, physics, algebra, trigonometry, geography, meteorology and topography. Students learn to calculate time, distance, headings, fuel consumption and more,” added LeBoff.

Learning to fly is a great way of expanding understanding of how engineering, science and math can explain how an airplane is able to fly.

“Each lesson includes Learning Videos, Curriculum Content, an activity, a flying mission and a Quiz. Students are free to watch the videos as many times as they feel necessary to complete the

quiz successfully," concluded LeBoff.

This program is available for all registered students in one physical school location on Google Classroom for \$1,995.00
