5 Key Projections on Future of Plastic Bottles Market for Forecast Period 2017-2026 (In Terms of Volume)

- Number of plastic container sold is expected to remain the largest in North America, accounting for nearly 30% share of the market by 2026-end. Asia-Pacific excluding Japan (APEJ) will also prevail as a profitable region for plastic container sales, accounting for over 25% share of the market by 2026-end. In addition, sales of Plastic Bottles in North America and APEJ are projected to reflect an equal and highest CAGR through 2026.

- Polyethylene terephthalate (PET, PETE, PETG, or polyester) will endure as the more remunerative packaging material in the global Plastic Bottles market, with sales pegged to exceed 50,000 MT by 2026-end. However sales of high density polyethylene (HDPE) will exhibit

the fastest expansion in the market through 2026. Number of Plastic Bottles produced by using polyvinyl chloride (PVC) will remain higher than those produced by using HDPE, although reflect a comparatively slower growth in sales through 2026.

- On the basis of packaging type, containers (Plastic Bottles, metal cans) and boxes and cartons will remain sought-after in the market, with sales collectively projected to hold roughly two-third share of the market by 2026-end. However, sales of bags & pouches are poised to exhibit a relatively faster growth in the market through 2026.

- Bottled water will continue to be the dominant application of Plastic Bottles, trailed by alcoholic beverages and carbonated soft drinks. Alcoholic beverages and carbonated soft drinks will account for roughly similar share of the market by 2026-end.

- Based on end-user, sales of Plastic Bottles in food & beverages will remain significantly higher than that in all the other end-users combined. Food & beverages will also prevail as the fast-growing end-user in the global Plastic Bottles market.
