The factors that drive the plant-based beverage market growth include health benefits associated with consuming plant-based milk as they are high in micro and macronutrient content as well as low in fat and cholesterol content. Moreover, rise in fitness concerns among people in different regions also boost the market growth. In addition, increase in the number of lactose intolerant population, growth in trend of veganism, and rise in disposable income drive the market growth. However, increase in cost of raw materials due to unpredictable weather and high cost of production are expected to hamper the growth of the market during the forecast period. Moreover, rise in demand for alternatives to dairy by health-conscious consumers and

frequent introduction of new flavors & variety are expected to provide numerous opportunities for the expansion of the plant-based beverage market.

The plant-based beverage market is segmented on the basis of source, type, distribution channel, and region. By source, the market is categorized into fruits, nuts, rice, soy, and others. By type, it is segmented into RTD tea & coffee, plant-based milk, and juices. Based on distribution channel, the market is categorized into hypermarkets & supermarkets, convenience stores, specialty stores, and online. Regionally, the market is classified into North America, Europe, Asia-Pacific, and LAMEA.
