*The Business Research Company's  
Infrastructure As A Service (IaaS) Global  
Market Report 2022 – Market Size,  
Trends, And Global Forecast 2022-2026*

LONDON, GREATER LONDON , UK,  
March 8, 2022 /EINPresswire.com/ --  
According to 'Infrastructure as a Service  
(IaaS) Global Market Report 2022 –  
Market Size, Trends, And Global

Forecast 2022-2026' published by The Business Research Company, the [infrastructure as a service market](#) size is expected to grow from \$65.87 billion in 2021 to \$82.93 billion in 2022 at a compound annual growth rate (CAGR) of 25.9%. The high growth in the market is mainly due to growth in online services due to COVID-19 that increased demand for IaaS. The IaaS market is expected to reach \$195.81 billion in 2026 at a CAGR of 24%. Rise in cloud adoption across several industry verticals such as banking, financial services and insurance (BFSI), government and education, healthcare, IT and telecom, retail, manufacturing, media and entertainment, and more at a rapid pace is expected to propel the market growth of infrastructure as a service market during the forecast period.

The global infrastructure as a service market consists of sales of computer infrastructure by entities (organizations, sole traders and partnerships) that provide IaaS on-demand through an internet platform. IaaS refers to providing access to computer infrastructure through networked servers. The market comprises of revenue generated by the establishments providing IaaS host hardware, software, servers, storage and other infrastructure components for their users. These components include networking features, computer hardware, space for data storage, system maintenance, backup and resiliency planning. Only goods and services traded between entities or sold to end consumers are included.

Infrastructure As A Service (IaaS) Market Report 2022  
– Market Size, Trends, And Global Forecast 2022-2026

Distributed cloud, referred to the availability of public cloud services in different physical solutions while the provider remains responsible for the operation, governance, updates and evolution of the services, is expected to be one of the major opportunities for the development of the infrastructure as a service market. This distributed cloud model is advantageous to the organizations that have faced issues related to the physical locations in the past. This will allow infrastructure and operations organizations to place the public cloud services at the locations of their choice which will attract consumers who are willing to modernize using the public cloud. The rise of Edge cloud computing and multi-cloud computing will eventually result in the rise to the concept of distributed cloud.

#### Global Infrastructure as a Service (IaaS) Market Segments
