

Progressive Web Application Market Emergen Growth, Overview, Competitive Strategies and Forecasts 2021 – 2028

Growing penetration of smartphones and surging Internet usage are projected to drive the progressive web application market during the forecast period

VANCOUVER, BC, CANADA, March 8, 2022 /EINPresswire.com/ -- [progressive web application market](#) is estimated to reach value of USD 10.44 Billion by 2027, according to a current analysis by Emergen Research. Progressive web applications (PWAs) remove any friction by using web to deliver app-standard experiences. The user need not have to install apps and he/she can simply navigate to the site on the browser, including Safari and Chrome. PWA focuses on loading more rapidly and using fewer data.

Rich features of progressive web application, such as push notifications on Android, touch gestures, geo-location, and ability to save icons of PWA on home screens to make them easily accessible, are making it popular among users. Moreover, another driving factor is that PWAs do have to replace native apps, as they work in tandem with them.

A surge in the number of smartphone users and significant amount of time spent by these users on apps are projected to propel the progressive web application market during the forecast period. However, complicated, slow-building, and deploying applications are projected to hamper the adoption of this technology in the near future. PWAs occupy limited space and they can run on low Internet speed and on offline mode as well. This drives the demand for PWAs exponentially.

The study performs a historical assessment of the Progressive Web Application from 2021 to 2028, focusing on the market trends, revenue share, growth rate, production capacity, pricing structure, and other vital aspects during that period.
