“I founded DICE Dental about two years ago because I saw patients turned away from dental care they needed because they couldn't afford it,” says Dr. Katie Alger, owner and operator of DICE Dental. “We run a lean business model to ensure that we can keep costs low for our patients.”

By specializing in only four services, DICE Dental keeps overhead low. They also use state-of-the-art technology to enhance efficiency. All of this translates into tremendous

cost savings for patients, sometimes in the hundreds of dollars compared to other Southampton dentists.

Dental implants are the most popular service offered by DICE Dental. A missing tooth is replaced by a durable titanium screw and color-matched crown custom-made in DICE's office. These natural-looking restorations can last as long as 15 years.

Dentures are another popular service offered by DICE. Both conventional dentures and implant overdentures are available. Dr. Alger and her team will walk patients through the benefits of both options and help them decide which treatment is best for them.
