outlined restraints of the market. Insights on opportunities are mentioned to assist market players in taking further steps by determining potential in untapped regions.

COVID-19 Scenario Analysis:

- Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost all countries around the globe, with the WHO declaring it a public health emergency. The global impacts of the disease are already starting to be felt, and expected to significantly affect the global batch management software market in 2020.
- Though governments have imposed lockdowns to contain spread of the virus, manufacturing and production units are at halt across the globe, which can affect the batch management software market in the short run.
- Batch management software is expected to aid certain sectors during the COVID-19 situation such as FMCG and pharmaceuticals. The pharmaceutical sector has witnessed a rise in the current situation to manufacture medicines used in the treatment of the disease. Batch management software would help to maximize this production and increase operational efficiency without compromising with on quality.
