COVID-19 Scenario Analysis:

The infected population requires medical supplies such as atomizer, life-support machine, oxygen generator, and monitor for sustaining. The growth in the number of individuals having COVID-19 is also boosting the need for the respiratory support devices and hence is anticipated to boost the medical supplies market in the coming years. These are majorly used medical devices in primary clinical treatment. Furthermore, COVID-19 has led to a rise demand for medical supplies that can be used to prevent the spread of infection such as personal protective equipment including masks, gloves, and protective eyeglasses. Both healthcare professionals and civil population need these personal protective equipment in order to ensure that the precautionary measures are taken care of. Manufacturers of these medical devices have a chance to gain maximum revenue in the near future.
