Increasing R&D spending for the developments of new treatment methods is again expected to foster market growth. For instance, in January 2022, Researchers at the Fralin Biomedical Research Institute at Virginia Tech have successfully identified a potential future treatment for patients with a form of brain cancer called glioblastoma.

Covid-19 Impact Analysis

The COVID-19 pandemic crisis has had significant impact on the practice of cancer treatment. There was disruption in supply of raw materials used for production of brain cancer therapies due to lockdown and social distancing norms.

Key Takeaways:

The brain cancer therapeutics market is expected to exhibit a CAGR of 9.8 % over the forecast period owing to the growing technological advancement for the development of novel therapies brain cancer.

North America is expected to witness significant growth over the forecast period owing to the high prevalence of brain cancer coupled with the presence of well-established healthcare industry. According to the National Brain Tumor Society, each year, approximately 70,000-170,000 cancer patients are diagnosed with brain metastases (metastatic brain tumors/secondary brain tumors), while ~100,000 will die every year as the result of brain metastases
