

# Medical Footwear Market Grows With Increasing Foot-Related Issues

*The Business Research Company's  
Medical Footwear Global Market Report  
2022 – Market Size, Trends, And Global  
Forecast 2022-2026*

LONDON, GREATER LONDON , UK,  
March 11, 2022 /EINPresswire.com/ --  
The rapidly growing prevalence of foot-  
related issues such as bunions & hallux  
valgus, plantar fasciitis, Achilles  
tendonitis, and arthritis is significantly  
contributing to the growth of the  
[medical footwear market](#). Foot-related

issues generally refer to the issues that relate to the feet which cause pain in the foot. Foot-related issues are common in people with diabetes. Some of the foot-related issues like bunions & hallux valgus, plantar fasciitis, Achilles tendonitis, and arthritis are common in these patients. Due to these food-related issues, doctors recommend to use medical footwear. For instance, according to the survey conducted by D López-López in 2021, there is an increase in the prevalence of foot pathologies, ranging between 61 and 79%, which is why they constitute an important public health problem. Most of the people were facing issues like bunions & hallux valgus, plantar fasciitis, Achilles tendonitis, and arthritis. So, an increase in these foot-related issues is driving the growth in the medical footwear market.

Technological advancement is a key trend shaping the global medical footwear market outlook. According to the medical footwear market analysis, major companies operating in the medical footwear sector are focused on developing new technological solutions to strengthen their position. For instance, in March 2020, Nike designed a new smart shoe model named Nike Adapt Auto Max. Nike Adapt Auto Max is the first continually updated performance product from Nike due to the near-symbiotic relationship between the shoe's digital app and the shoe's opt-in firmware updates. By using these smart shoes consumers can link shoes with their mobiles and track workouts daily. In the coming years, companies such as MI and Under Armor are also planning to launch their smart shoes into the market. For example, the MI - Mijia Smart Shoes and Under Armor - UA HOVR Sonic 3.

Medical Footwear Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026

<https://www.thebusinessresearchcompany.com/report/medical-footwear-global-market-report>

The global medical footwear market size is expected to grow from \$8.40 billion in 2021 to \$8.97 billion in 2022 at a compound annual growth rate (CAGR) of 6.80%. The growth in the market is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The medical footwear market share is expected to reach \$11.76 billion in 2026 at a CAGR of 7.0%.

Major players covered in the global medical footwear industry are Aetrex Worldwide Inc., Orthofeet, Duna, Darco International Inc., Dr. Zen Inc., Gravity Defyer Corp., Dr. Foot Inc., DJO LLC (Dr. Comfort), and Horng Shin Footwear Co.

North America was the largest region in the medical footwear market in 2021. Asia-Pacific is expected to be the fastest-growing region in the forecast period. The regions covered in the medical footwear market report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East and Africa.

TBRC's global medical footwear market report is segmented by product into medical shoes and boots, medical sandals, others, by sales channel into direct sales of medical footwear, footwear specialty stores, medical and healthcare centers, online retailers of medical footwear, mono-brand stores, others, by application into diabetic shoes, arthritis shoes, bunions and hallux valgus shoes, flat feet shoes, others, by end-user sex into men, women.
