

# Find out what Challenges and Advantages there are, but as well how Manufacturing in Space can help shape the Future

*SMi Group Reports: Mr Joshua Western, CEO & Co-Founder at Space Forge will be presenting on "In Space Manufacturing for Security and Sustainability"*

LONDON, UK, March 11, 2022

[/EINPresswire.com/](https://www.einpresswire.com/) -- Military Space [Disruptive Technology](#) 2022 which takes place on the 25-26 April 2022 at Cophorne Tara Hotel, London, UK will host a range of international speakers, providing you with the opportunity to gain a global perspective on "Forging the Future by harnessing the power of [innovation](#)".

When you are trying to manufacture materials and products that offer game-changing levels of performance and efficiency, the Earth's atmosphere, temperature and gravity all present different challenges. In space though, there is no gravity, it's a pure vacuum and extreme temperature changes can be achieved by harnessing the power of the Sun.

But manufacturing in space is a non-starter for many organisations. That's where Space Forge comes in, first of it's kind, find out what challenges and advantages there are, but as well how Manufacturing in Space can help shape the future.

With this in mind, SMi Group are pleased to announce that Mr. Joshua Western, CEO & Co-Founder from Space Forge will be presenting "In Space Manufacturing for Security and Sustainability", presentation will be as followed:

- The advantages of in-space manufacturing and how it can augment national capabilities
- Return from space - a shift in satellite build and refurbishment
- Closing the loop - responsive launch with tactical return
