

Bladder Cancer Drugs Market Players Invest In Nanotechnology

The Business Research Company's Bladder Cancer Drugs Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026

LONDON, GREATER LONDON, UK, March 14, 2022 /EINPresswire.com/ -- Global [bladder cancer drugs market](#) leaders are investing on the research to utilize nano-technology as a means to deliver drugs into the human body. Nanotechnology is the design, characterization, production, and

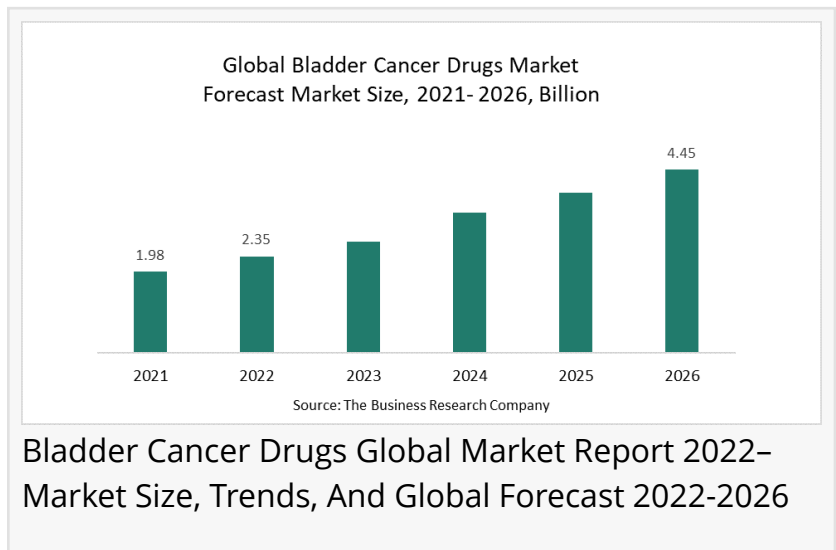

application of devices, structures and systems by controlled manipulation of size and shape at the nanometer scale. Bladder cancer drugs market trends include this method of delivery which helps doctors to offer a simple and effective way of treating bladder cancer in their patients, due to the fact that the nanoparticles used in the treatment can attack the cancerous cells directly without harming the surrounding cells. For instance, the Center for Drug Research And Development in Canada has pledged a \$1.2 million investment in Sitka biopharma to help with development activities for clinical trials of STK-01, a product to treat bladder cancer using nanotechnology.

The number of bladder cancer cases has been on the rise. Factors such as unhygienic workplace exposures, increase in smoking habits and consuming water that contains Arsenic increases the chances of blood cancer. According to American Cancer Society, there were 81,400 new cases of bladder cancer in 2020 out of which a total of 62,100 cases were in men and 19,300 cases in women. This increased incidence of bladder cancer increases the demand for bladder cancer drugs, contributing to the growth of the market.
