

# What are the Leading Challenges for Microfibrillated Cellulose Fiber Market Players – Exclusive Study by Fact.MR

*Microfibrillated Cellulose (MFC) Fiber Market, Forecast, Trend, Analysis & Competition Tracking - Global Market Insights 2021 to 2031*

DUBLIN, IRELAND, March 14, 2022 /EINPresswire.com/ -- 250 Pages  
Microfibrillated Cellulose Fiber Market Survey by Fact MR, A Leading Business and Competitive Intelligence Provider

Latest industry survey by Fact MR, predicts [sales of Microfibrillated Cellulose Fiber](#) to swell at propelled CAGR through 2031, as chemical and materials sales gradually recover post disruptions caused by COVID-19. The report is aimed at furnishing insights into hidden growth opportunities and challenges. It also provides recommendations to aid businesses prep for unforeseen challenges.

The market intelligence study therefore includes demographics analysis so market players can plan their product and marketing strategy. It offers sales outlook in 20+ countries. It identifies the most lucrative segments to assist companies in creating winning strategies for future.

To remain 'ahead' of your competitors, request for a sample – [https://www.factmr.com/connectus/sample?flag=S&rep\\_id=1710](https://www.factmr.com/connectus/sample?flag=S&rep_id=1710)

Wood is made up of a cellulose matrix of fibril bundles, which are made of smaller elements known as microfibrils. The crystalline nature of cellulose microfibrils are maintained through processes of electrospinning, homogenizing, ultrasonication, grinding, and cryo-crushing, allowing for superior mechanical properties. The unique characteristics of microfibrillated cellulose (MFC) fiber makes it a highly-sought-after material in multiple end-use industries.

The report offers actionable and valuable [market insights of Microfibrillated Cellulose Fiber](#). The latest report by Fact.MR provides details on the present scenario of the market across various regions along with the historic data and forecast of the market. The report also includes information on the sales and demand of Microfibrillated Cellulose Fiber Market across various industries and regions.

The market study done by Fact.MR gives exclusive information about how the market will grow. The study identifies crucial trends that are determining the [growth of Microfibrillated Cellulose Fiber market](#). This newly published report sheds light on vital dynamics, such as the drivers, restraints, and opportunities for key market players as well as emerging players associated with the production and supply. The latest report by Fact.MR provides detailed Market Analysis of Microfibrillated Cellulose Fiber

This newly published and insightful report sheds light on Market Insights of Microfibrillated Cellulose Fiber, key dynamics, their impact on the overall value chain from suppliers to end-users and Growth of Microfibrillated Cellulose Fiber Market.

#### Key Segments of Microfibrillated Cellulose Fiber Market

##### - Application

- Barrier Films
- Performance Enhancers
- Rheology Modifiers
- Thickening Agents
- Strengthening Agents

##### - End-use Industry

- Paper
- Packaging
- Dairy
- Others
- Food
- Paints & Coatings
- Personal Care
- Others

##### - Region

- North America (U.S. & Canada)
- Latin America (Mexico, Brazil, & Rest of LATAM)

Europe (EU-4, Nordic, Benelux, Poland and Rest of Europe)

Russia/CIS

Japan

Asia Pacific excluding Japan (China, India, ASEAN, South Korea, Australia, and New Zealand, and Rest of APEJ)

Middle East & Africa (GCC countries, South Africa, and Rest of MEA)

Full Access of this Exclusive Report is Available at- <https://www.factmr.com/checkout/1710>

### Key Takeaways of the Microfibrillated Cellulose Fiber Market Study

- Emerging packaging applications such as personal care & cosmetics and food packaging will fuel value growth by 3.3X through 2029

- Barrier film applications among other microfibrillated cellulose applications are estimated to surpass US\$120 Mn by 2029 end owing to its advanced barrier properties and growing demand for MFC film for packaging applications

- Fact.MR reports that demand for paper and packaging end use industry of microfibrillated cellulose fiber collectively accounts for over one-third of the global consumption

- Paints and Coatings among other end-use industries is likely to witness a striking growth of ~15-16% throughout the assessment period (2019-2029)

- As compared to developing regions, the sales of microfibrillated cellulose fiber are envisaged to be higher in the countries of North America and Europe.

- However, developing countries such as India and China are anticipated to gain lucrative profits in the coming years.

“With the rising trend of sustainable packaging, microfibrillated cellulose fiber will go mainstream with manufacturers focusing on expansion of production capacity and collaboration with industry giants,” says the Fact.MR analyst.

### Advancement of Production Technology to Remain Top Priority of Prominent Players

- The microfibrillated cellulose fiber market is highly consolidated with key players ruling the overall market with 75% of the global sales. Manufacturers are increasingly focusing on advancement of production technologies to develop innovative products to maintain a strong position in the market.

- Manufacturers are expanding their production capacity and collaborating with end-use industry giants to meet the growing demands of microfibrillated cellulose fiber globally.

## Report Benefits & Key Questions Answered

- How will the microfibrillated cellulose fiber market expand through 2031?

The global microfibrillated cellulose fiber market is likely to derive growth from packaging applications in the food, personal care, and pharmaceutical sectors, reflecting an impressive CAGR of around 13% through 2031.

- Which is the dominant MFC fiber market?

Europe is expected to be the leading market for microfibrillated cellulose fiber products, driven by strong revenue growth in the EU-4.

- How is COVID-19 impacting the microfibrillated cellulose fiber growth projections?

The COVID-19 pandemic has moderately affected growth in the industry. Lockdown restrictions through 2020, especially in terms of food packaging, has hurt demand from the food service sector.

- Who are some of the prominent MFC fiber market players?

Prominent microfibrillated cellulose fiber manufacturers include Borregaard, Daicel FineChem Ltd., SAPPI, Norkse Skog, Cellu Comp Ltd, FiberLean Technologies Ltd., Weidmann Fiber Technology.

## More Valuable Insights on Microfibrillated Cellulose Fiber Market

Fact.MR, in its new report, offers an unbiased Market Analysis of Microfibrillated Cellulose Fiber, Sales and Demand of Microfibrillated Cellulose Fiber, analyzing forecast statistics through 2019 and beyond. The study reveals growth projections on the basis of various criteria.

Explore Fact.MR's Coverage on the Chemicals and Materials Domain:

Bio-succinic Acid Market - <https://www.factmr.com/report/5405/biosuccinic-acid-market>

The covid-19 pandemic had disastrous impact on the global Bio-succinic Acid market. Due to restrictions on transport from region to region, it had adverse consequences on the market. Government initiatives to stop the disease from spreading like lockdown rules had to take place at the cost of a significant down fall of the overall Bio-succinic Acid production.

Surge Suppression IC Market - <https://www.factmr.com/report/surge-suppression-ic-market>

According to the latest study by Fact.MR, surge suppression IC market is expected to grow significantly over the projected forecast period (2021-2031). Increased focus for the security of power supply and expanding interest for utility clients have provided a positive outlook to the suppression IC market

Liquid Propellants Market - <https://www.factmr.com/report/Liquid-Propellants-Market>

The expansion of the rocket propulsion sector is fueled by an increase in the number of space expeditions, high efficiency and technological improvements in the rocket propulsion, due to which the liquid propellants market is expected to grow at a CAGR of over 7% during the forecast period and demand for the product is set to behold the huge gain.
