

3D Printing Software and Services Market Applications, Size, Trends, Demand, Types, Technology and Forecasts Report 2027

Investment by the government on 3D printing projects and reduction in manufacturing cost, along with process downtime, will drive the market demand.

VANCOUVER, BC, CANADA, March 14, 2022 /EINPresswire.com/ -- The global 3D printing software & services market is forecasted to be worth USD 9,571.6 Million by 2027, according to a currency analysis by Emergen

Research. The industry for 3D printing

software & services is witnessing a surge in demand as there is an increased application in consumer products, motor vehicles, and medicals, among others. The reduction in errors and overall time and development cost, ease in manufacturing, and the ability to build very intricate tailored designs are driving the market growth.

The market is revolutionizing the industry, with automation becoming a norm in manufacturing sectors. It will witness increased investment by manufacturing companies as it reduces cost by limiting the need for man force and can produce goods locally. However, deployment of large-scale 3D printing software & services is quite high, and the lack of governing bodies for the regulation of the market will curb the growth of the 3D printing software & services market.

Some major players in the global market include

3D Systems, Stratasys, GE Additive, EOS GmbH, Voxeljet, SLM Solutions, Hewlett Packard, Optomec, Autodesk, and Protolabs, among others.

The Global [3D Printing Software and Services Market](#) Research Report is furnished with the latest

information about product specifications and portfolio, technological advancement, product type, and manufacturing. Major factors such as revenue, costs, and gross margin are taken into consideration while formulating this report. The report provides extensive data concerning the key market players along with their SWOT analysis, financial standing, technological and product development, and recent strategic business expansion plans.

Emergen Research has segmented into the global 3D Printing Software & Services Market on the basis of component, process, application, industry verticals, technology, and region:

Component Outlook

Software

Design Software

Scanning Software

Pinter Software

Inspection Software

Service

Process Outlook (Revenue, USD Billion; 2017-2027)

Material Extrusion

Material Jetting

Powder Bed Fusion

Vat Photopolymerization

Binder Jetting

Sheet Lamination

Directed Energy Deposition

Application Outlook (Revenue, USD Billion; 2017-2027)

Functional Part Manufacturing

Prototyping

Tooling

Industry Verticals Outlook (Revenue, USD Billion; 2017-2027)

Engineering

Aerospace and Defense

Consumer Products

Healthcare

Energy

Education

Printed Electronics

Architecture and Construction

Food and Culinary

Automotive

Jewelry

Technology Outlook (Revenue, USD Billion; 2017-2027)

Fused Deposition Modeling (FDM)

Direct Metal Laser Sintering (DMLS)

Inkjet Printing

Laser Metal Deposition (LMD)

Laminated Object Manufacturing (LOM)

Stereolithography (SLA)

Selective Laser Sintering (SLS)

PolyJet/Multijet Printing (MJP)

Electron Beam Melting (EBM)

Direct Light Projection (DLP)

Others

Key Highlights from the Report

In November 2019, Stratasys made an announcement about the launch of Work Order Management Software for application 3D Printing workshops

In the medical sector, 3D printing software & services are used to make implants, scaffolds, surgical instruments, and prosthetics. The growing demand for advanced medical products and prosthetics are propelling the demand for the market.

Digital fabrication technology has made 3D prototyping cost-effective and less time-consuming. A variety of materials can be used for the prototype application, such as cheap PLA, durable nylon, impact-resistant ABS, and others. The prototyping application segment is forecasted to grow with a significant CAGR during the forecast period.

Detailed Regional Analysis covers:

North America (U.S., Canada)

Europe (U.K., Italy, Germany, France, Rest of EU)

Asia-Pacific (India, Japan, China, South Korea, Australia, Rest of APAC)

Latin America (Chile, Brazil, Argentina, Rest of Latin America)

Middle East & Africa (Saudi Arabia, U.A.E., South Africa, Rest of MEA)

Key Questions Answered in the Report:

What will be the estimated growth rate of the 3D Printing Software and Services market by

2027?

Who are the prominent distributors, vendors, and manufacturers of the market?

What are the driving and restraining factors of the growth of the 3D Printing Software and Services market throughout the forecast period?

What are the current and future market trends of the 3D Printing Software and Services market?

What are the sales and price analysis of the product by types, applications, and regions?

What are the expected opportunities for the companies and new entrants in the coming years?
