

# SmartGridCIS to Partner with Digital Home Energy Management Platform EIQhome.com

*Transformative Capabilities Sets New Standard for Energy Supplier MyAccounts*

HOUSTON, TX, USA, March 15, 2022 /EINPresswire.com/ -- SmartGridCIS, a Univerus Company, and EIQhome, LLC today announced their partnership to offer the next generation of MyAccount experience on the SmartGridCIS billing and digital customer engagement platform for retail electricity suppliers and utilities across the U.S.

The combination of SmartGridCIS and EIQhome technology working together sets the new standard for a comprehensive billing and #customer #engagement solution that delivers exceptional #home #energy #management capabilities.

EIQhome's Home Management Platform makes managing home energy simple and stress-free. By using the latest in AI and digital technology and by integrating with multiple home IoT devices, smart meter data, and supplier billing data, EIQhome provides households with the "Go To" MyAccount to manage all their [home energy management](#) and sustainability needs.

MyAccount, Home Energy Management experience available.”

EIQhome CEO Dan Sullivan adds, “We are thrilled to be an official partner with SmartGridCIS and to integrate our home energy management solution with their billing and customer communications platform. I see this as a true 1 + 1 = 3 partnership that delivers tremendous value to our clients and end-use customers”.

The new SmartGridCIS MyAccount option fully integrates with customer billing information, smart meter data (SMT), and a variety of energy IoT devices including #Tesla EVs,

#Nest, and #Ecobee thermostats, and #Sense real-time energy monitoring. Work is ongoing to expand its integration network with various suppliers of #EVs, distributed generation, energy storage, and other smart energy devices.

The new SmartGridCIS MyAccount option automatically captures key billing and usage data so the user can easily monitor and manage against their energy cost and sustainability goals. The system offers users multiple options to view the data in clear charts and graphs. The system also offers automated alerts as a means of proactively keeping households on top of their costs, usage, and sustainability goals.
