

Automotive Blockchain Market Size Expected to Reach USD 3,089.9 Million By 2028

Automotive Blockchain Market Size – Increasing number of mandates by government to reduce the vehicle emissions as well as the demand for passenger comfort

NEW YORK, NY, UNITED STATES, March 14, 2022 /EINPresswire.com/ --Increasing focus related to the lowering of the manipulation of the data as well

as the data leaks is one of the major factors that is propelling the growth of the market. However, the uncertainty of the regulations related to the blockchain may affect the growth of the market through the forecasted period.

<u>Automotive Blockchain Market</u> Size – USD 376.6 Million in 2020, Market Growth - CAGR of 34.95%, Market Trends – Increasing number of mandates by government to reduce the vehicle emissions as well as the demand for passenger comfort are the factors adding up to the growth of the Automotive Blockchain market.

According to the current analysis of Reports and Data, the global Automotive Blockchain market was valued at USD 376.6 Million in 2020 and is projected to grow at a CAGR of 29.70% from 2020 to USD 3,089.9 Million in 2028. Factors affecting the growth of the Automotive Blockchain market are the rising focus related to the reduction of the data manipulation as well as leaks, and the efficiency Automotive Blockchain provides with its low operational cost. These factors will propel the growth of the market over the forecasted period. However, the uncertainty of the regulation that are associated with the Blockchain can affect the market growth through 2026.

Blockchain is a decentralized, distributed ledger that can record the provenance of a digital asset. The implementation of this technology in the automotive industry is called as Automotive Blockchain. The blockchain technology has made a huge impact in the automotive industry due to the features like prompt transactions, and low data leaks amongst others.

The implementation of 5G network infrastructure will boost the further growth of the

Automotive Blockchain market. As high tech features for in-vehicles are increasingly becoming available, connected through networks, blockchain in automotive industry is gaining more traction. Combining blockchain and 5G technology to automated vehicles can provide number of possibilities for tracking, monitoring, protection against cyber-security threats as well as the ability to share the information of the vehicle amongst others.

For automotive OEMs, secure blockchain offers a vital platform for mobility scores that can determine the OEMs relative value as well as the reliability. Blockchain can be used to collect key driving habits to reward the users and lower down potential damage.

The introduction of the blockchain in the automotive industry is witnessing innovations from leading players which is expected to supplement the growth of the market.

Key participants include IBM (U.S.), Accenture (Ireland), Microsoft (U.S.), CarVertical (Estonia), Helbiz (U.S.), Tech Mahindra (India), HCL Technologies (India), Xain (Germany), NXM Lab (U.S.), Carblock (U.S.), Cube (South Korea), Context Labs (Netherlands), Shiftmobility (India), Bigchaindb (Germany), Dashride (U.S.), and Consensys (U.S.).

Further key findings from the report suggest

- •The Global Automotive Blockchain market is forecast to grow from USD 376.6 Million in 2020 at a rate of 34.95% CAGR to reach a valuation of USD 3,089.9 Million in 2028.
- •Increasing focus related to the reduction of the manipulation of the data as well as data leaks is one of the major factor boosting the growth of the market.
- However, the uncertainty of the government regulations related to blockchain is one of the major factors that will affect the growth of the market over the forecasted period.
- •Mobility Solutions segment is forecasted to witness fastest growth in the coming years on account of rapid growth of shared mobility industry, rise in the consumer demands, and the inclusion of blockchain in automotive business models.
- Japan is introduced the blockchain technology for car insurance registration, thereby lowering the involvement of the third party and the middleman.
- •Applications and Solutions provider segment was the leading segment in 2018. The segment was valued at USD 76.8 million and is forecasted to grow to more than USD 600 million through 2026 on account of rising number of applications.
- •Asia Pacific region is forecasted to grow the fastest over the forecast period. Strong economic growth, rising population, rapid urbanization as well as an increasing purchasing power of the people in this region are some of the factors for the growth of the region. Other factors like increasing foreign investments in this region is boosting the growth of the market.

For the purpose of this study, Reports and Data have segmented the Automotive Blockchain Market on the basis of Application, By Provider, By Mobility type, and Region:

Application (Revenue, USD Million; 2018–2028)

- Imart Contracts
- •Bupply Chain
- •Binancing
- •Mobility Solutions
- Others

Provider (Revenue, USD Million; 2018–2028)

- •Middleware Provider
- •Infrastructure and Protocol Provider
- Application and Solutions Provider

Mobility type (Revenue, USD Million; 2018–2028)

- Bersonal Mobility
- Shared Mobility
- •Dommercial Mobility

Regional Outlook (Revenue in USD Million; 2018–2028)

- •North America
- •Burope
- Asia Pacific
- •Rest of the World

Key Advantages of Automotive Blockchain Report:

- Identification and analysis of the market size and competition
- •Qualitative and quantitative analysis of the market data
- •Data validated by industry experts after extensive primary and secondary research
- •Extensive regional analysis of the Automotive Blockchain industry
- •Brofiling of key players along with their business overview, business strategies, deals and partnerships, and product portfolio
- •BWOT and Porter's Five Forces Analysis for in-depth understanding of the competitive

landscape

- •Beasibility analysis and investment analysis to enable strategic investment decisions
- •Analysis of opportunities, drivers, restraints, challenges, risks, and limitations

Conclusively, all aspects of the Automotive Blockchain market are quantitatively as well qualitatively assessed to study the global as well as regional market comparatively. This market study presents critical information and factual data about the market providing an overall statistical study of this market on the basis of market drivers, limitations and its future prospects.
