/EINPresswire.com/ -- According to IMARC Group's latest report, titled "[Holographic Display Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026](#)", the global market exhibited strong growth during 2015-2020. A holographic display uses coherent light to create a three-dimensional (3D)

image in space. It has the potential to create 3D objects in volumetric space by engaging all four visual functions, motional parallax, binocular disparity, accommodation, and convergence. The holographic display requires control over light and a huge amount of significantly smaller pixels. As a result, the holographic display is extensively used across the medical, food and beverage (F&B), pharmaceutical, automotive, telecommunications, and entertainment industries.
