

Suntrol Helps Prevent Collision-related Bird Deaths

CLEVELAND, OHIO, UNITED STATES, March 15, 2022 /EINPresswire.com/ -- The Audubon Society estimates that about one billion birds are killed each year due to collisions with glass that birds mistake for sky, habitat or fly-through zones, making glass collision the second leading cause of bird deaths annually.

Bird-safe window films from [Suntrol](#) help prevent bird deaths, containing a pattern that birds can see, but is unobtrusive to the human eye.

“Windows bring the beauty of the outdoors in, but bird deaths resulting from collision has become a crisis,” said Suntrol’s owner, John Hansen. “Bird-safe film is an effective way to help prevent unnecessary death and injury, which is more important than ever considering two thirds of North American bird species are now [facing extinction](#).”
