

Bay Area Scientist Dr. Larry Bluford Sr. Created a “Real Utopia” Using Mind-Bot Technology

Utopia will be installed across the San Francisco Bay Area first, and then across America and the world

SAN FRANCISCO, CALIFORNIA, UNITED STATES, March 15, 2022 /EINPresswire.com/ -- Dr. Larry Bluford Sr., PhD and Self-Preservation Technology research scientist is a self-taught, self-made scientist, and creator of a new field of scientific study he named self-preservation technology, and for 25 years he has been the first and only self-preservation technology researcher and subject matter expert in that field, and he's also the inventor of MindBot Technology.

As a result, he has rightfully bestowed upon himself the title of Doctor and PhD., because he is the one and only subject matter expert in this field in the entire world and that puts him beyond a PhD.

He will use MindBot Technology to end human suffering, by ending human limitations, by creating a product line of superpowers for humans such as Immortality Technology products like a Fountain of Youth dose to live as long as desired in a healthy body, Instant Teleportation, Resurrection Technology Insurance, Utopia on Earth Citizenship, etc., etc.

To achieve it he designed and engineered a real, living, breathing, and operating utopia that has solved all of humanity's problems now and into the future and it is the only path to life and happiness versus the other three paths of failure, suffering, and death.

It starts with a pilot program in the San Francisco Bay Area that will lead to Utopia America and then Utopia Worldwide.

The goal is to transform the San Francisco Bay Area into:

- A zero welfare, zero homeless, and zero street crime region
- Dubai on steroids
- The crown jewel of the world
- An explosion of wealth and prosperity
- The home of silicon valley 2.0: the end of human limitations

The foundation of any utopia is the absence of wars, poverty, welfare, street crime, the poor class, and the homeless because it is impossible to create a Utopia if any of those exist.

For the San Francisco Bay Area to live in a crime-free utopia, welfare, homelessness, the working poor, and the middle class will be lifted up and into the rich and wealthy classes.

Dr. Larry Bluford Sr. is the first and only MindBot Engineer and has successfully operated Utopia San Francisco Bay Area since November 2020.

He guarantees to end welfare and homelessness in the San Francisco Bay Area within six months and within those same six months guarantees an explosion of instant prosperity throughout the Self Preservation Triangle and beyond.

The sole purpose of MindBot Technology is to "end human limitations" that starts with the installation of Utopia San Francisco Bay Area in the Self Preservation Triangle.

The Self Preservation Triangle is the triangular area from San Francisco-to-Sacramento-to-San Jose that will be converted into the world's first utopia.

Self-preservation technology research has allowed him to become the world's only MindBot Technology Engineer who has eliminated all the world's problems by being able to achieve anything he can dream of or imagine and transfer it to the outside world.

It has resulted in a flawless Utopia San Francisco Bay Area operating perfectly since November 2020 and will soon be installed across the entire bay area region because there is no other choice.
