

# North Texas Public Safety Unmanned Response Team & Mansfield, TX OEM expand regional interoperability using DragonForce

*North Texas Public Safety Unmanned Response Team (NTXPSURT) and Mansfield, TX EMA expand regional interoperability using DragonForce*

BLUEBELL, PENNSYLVANIA, UNITED STATES, March 17, 2022

/EINPresswire.com/ -- Drakontas, the provider of the command and control platform [DragonForce](#), has been selected by North Texas PSURT and Mansfield, TX Emergency Management Agency to enable a regional, multi-agency interoperability solution equipping public safety professionals and community volunteers with the essential tools to quickly assess and respond to emergency operations.

“

The tools and features we are already using in DragonForce have improved our workflow and communication tenfold, and we have barely scratched the surface in terms of what the platform can do.”

*Greg Cutler - Captain  
Mansfield, TX OEM*

DragonForce, the multipurpose team collaboration platform, provides critical communication tools that empower public safety professionals to make better, faster, and safer decisions. DragonForce provides critical personnel location data and voice communications interoperability, enabling multiple agencies to collaborate effectively using the smartphones, tablets, and laptops they already use.

North Texas PSURT and Mansfield, TX OEM now have a fully capable regional interoperability platform that enables decision-makers to pull resources from either agency to assemble the best team possible. DragonForce

response groups can be quickly created, drawing from members and resources from the entire

North Texas region who can then collaborate and respond in real-time. “Coordinating our operations and utilizing resources from multiple agencies has reduced our response times drastically. We assign groups quickly from our command center while monitoring responding members, and it’s as simple as dropping an icon on a map. That has reduced the load on our communications system rather than constant radio check-ins for location updates,” said Greg Cutler, Captain Mansfield, TX OEM. “We are now able to quickly and easily assign search grids and roles to operators or volunteers as they arrive on scene and then capture real-time damage assessments using mobile Windshield Survey forms to get a rapid assessment and eyes on the scene. The tools and features we are already using in DragonForce have improved our workflow and communication tenfold, and we have barely scratched the surface in terms of what the platform can do.”

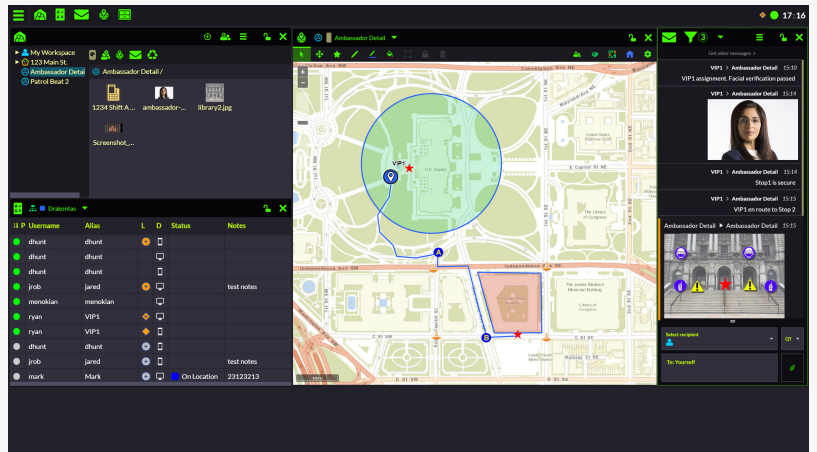

“We are very pleased that North Texas PSURT and Mansfield TX are expanding the offering and utilizing the full potential of DragonForce to help them fulfill their mission of delivering regional interoperability to the entire North Texas region,” stated James Sim, CEO of Drakontas. “DragonForce was designed to scale and support complex deployments like this where multiple, disparate jurisdictions need to be able to communicate and collaborate easily using a robust set of tools especially architected for public safety operations.”

#### About North Texas PSURT

The mission of the North Texas Public Safety Unmanned Response Team is to provide professional UAS assistance to jurisdictions and emergency operations centers in support of their response, relief, and immediate recovery efforts. They are tasked with providing situational awareness through the use of UAS flights in order to aid in decision making and problem-solving during incidents utilizing the DragonForce Platform for their command and control (C2)
