

Capital Numbers is Honored with BCC&I's MSME Sustainability Award 2022

Capital Numbers receives the MSME Sustainability Award from BCC&I for its green initiatives and energy efficiency norms.

KOLKATA, WEST BENGAL, INDIA, March 16, 2022 /EINPresswire.com/ -- The Bengal Chamber of Commerce & Industry (BCC&I) recently honored Capital Numbers with the MSME Sustainability Award for successfully implementing environmental-friendly measures to lessen the climate crisis. Only a handful of MSMEs were announced winners in this category by the esteemed jury members. Capital Numbers feels honored to be rewarded and recognized among the top few.

Sustainability has always been high on Capital Numbers' agenda. It has operated out of Gold standard green building for several years.

Keeping the environmental risks in mind, the company lets 90% of its employees use laptops and only 10% use desktops. This initiative has led to cost-effective maintenance and minimized e-waste. Besides, the company has reduced its electricity consumption over the last three years, which is quite an impressive move.

Currently, Capital Numbers operates within a hybrid work culture to reduce the number of people physically present in the office. This has drastically reduced emissions and fuel use. The company has also switched to e-contracts and e-signatures to go paperless as far as possible.

In short, a set of <u>climate-focused approaches</u> has allowed Capital Numbers to promote a low-carbon economy. The company has remained environmentally responsible over the years, and

the BCC&I award is proof of that.

As it grows, the company plans to continue developing a low-carbon infrastructure. It is also ready to reuse all hardware components wherever possible.

So far, India's MSME sector has been critical in promoting sustainability and energy efficiency across the country. And Capital Numbers is proud to be a part of this sector that aims to 'go green' for a sustainable future.

The BCC&I award has further inspired Capital Numbers to bring in more green initiatives. Going forward, the company plans to reduce and recycle all e-waste for the greater good of society and the environment. After all, the growing risks of climate change need immediate attention and the time to act is now.
