

Underfloor Heating Market is Expected to Exceed \$8.39 billion by 2030, registering at 6.9% CAGR

Rise in urban migration, rapid expansion of multi-story buildings have boosted the growth of the market.

PORTLAND, OREGON, UNITED STATES, March 16, 2022 /EINPresswire.com/ -- Global underfloor heating market size was valued at \$4.30 billion in 2020, and is projected to reach \$8.39 billion by 2030, growing at a CAGR of 6.9% from 2021 to 2030. Underfloor heating is a form of central heating and cooling that achieves indoor climate control for thermal comfort using hydronic or electrical heating elements embedded in a floor. The rise in awareness regarding the prospects of underfloor heating is expected to open up opportunities for the market.

Underfloor Heating

Moreover, engendering awareness throughout the globe toward the use of eco-friendly products is expected to boost the sales of [the underfloor heating market](#) throughout the forecast period. Governments across the globe are promoting sustainable ways to meet zero carbon emission targets. This fuels the growth of the market. Rapid industrialization and development of the construction sector in developing countries such as China and India is a huge potential market for [market expansion](#) for the manufacturers. The presence of a huge landmass in the cold climatic region in highly populated countries such as China, and India has a huge demand for underfloor heating to improve the comfort of the individuals living in these zones. The increased investment of developing countries in regards to infrastructure has stimulated the demand for construction industries, hence driving the growth of the underfloor heating market.

The Canadian government policies for permanent residency for immigrants have led to the boom of residential construction which has been a significant factor in driving the growth of the

underfloor heating market. The increase in awareness among the individuals in regards to the application of underfloor heating equipment to improve the standard of living has boosted the demand for this product. High upfront cost such as installation and improper awareness among the people regarding the underfloor heating equipment is major factor hampering the growth of the market.

The underfloor heating market is segmented on the basis of product type, system, installation type, application, and region. By product type, the market is categorized into hydronic and electric. In terms of value, the hydronic segment accounted for [the largest share](#) in 2020. On the basis of system, the global market is segmented into heating system, and control system. In terms of value, the heating system segment accounted for the largest share in 2020.

On the basis of installation type, it is divided into new installations, and retrofit installations. In terms of value, more than new installation segment accounted for the largest share in 2020. The applications of underfloor heating market include residential, commercial, and industrial. In terms of value, the residential segment accounted for the largest share in 2020.

Impact Of Covid-19 On The Global Underfloor Heating Market

- The Covid-19 pandemic negatively affected the market as the underfloor heating systems may become culprit of microbial contamination in enclosed spaces.
- The shutdown of construction and engineering projects led to financial recession in the construction industry. This negatively affected the demand for underfloor heating devices.

Key findings of the study

- By region, Europe accounted for the largest market share in 2020.
- By Product type, the Hydronic segment holds the largest market share in 2020.
- By System, Heating system segment holds the largest market share in 2020.
- By Installation, New installation segment holds the largest market share in 2020.
- By Application, Residential segment accounted for the largest underfloor heating market share in 2020
- Countries such as China and India are emerging as an investment centric economy.
- Emergence of COVID-19 event has significant effect on the growth trajectory of this market in construction sector.
