“

With this COVID-19 ebook, Infectious Disease experts have the most comprehensive data on the SARS-CoV-2 virus and its infection - under one roof, and at the click of a button.”

Stephen A. Berger, MD

Dr. Stephen Berger, Co-founder and Medical Advisor at GIDEON states, “Healthcare professionals, researchers, and public health agencies are under pressure to assimilate and analyze COVID-19 data to prevent future outbreaks and pandemics. With this COVID-19 ebook, Infectious Disease experts have the most comprehensive data on the SARS-CoV-2 virus and its infection - under one roof, and at the click of a button.”

[The COVID-19 ebook](#) offers:

- Descriptive epidemiology
- Status of the infection – worldwide and by country
- Clinical features
- Distribution maps
- Images
- A complete list of clickable references, and much more.

The GIDEON database contains [425 ebooks on the A-Z of infectious diseases](#), literally. Readers can learn

everything about acanthocephalan worms and actinomycosis to yellow fever and yersiniosis. The vast ebook collection also includes a country-specific series with insights into infectious diseases from Afghanistan to Zimbabwe. The GIDEON Guide series provides comprehensive and easy-to-use data on cross-border infections, outbreaks, surveys, antimicrobial infections, medically-important bacteria, vaccines, and much more. The GIDEON Guide to Outbreaks, for example, summarizes the status of 26,000+ infectious disease outbreaks, with data in 5,857 tables, and includes charts and over 64,000 electronically-linked references.

“These 2022 ebook releases are another way for GIDEON to support our rapidly-growing community of healthcare professionals and researchers in the war against infectious diseases,” states Uri Blackman, CEO of GIDEON. He adds, “Our data is based on a vast body of epidemiological information. The outbreak data dates back to 1348 AD!”

The GIDEON database tracks 364 infectious diseases and 2000+ pathogens. Additionally, it contains 87,000+ prevalence and seroprevalence surveys, a chronology of all cross-border infections, 38,000+ epidemiology graphs, and nearly 24,000 detailed country notes. Data is referenced and appropriately cited so researchers can quickly gather citations for publications.
