

Recessed TruTrack Magnetic Lighting System with Tubo Zoom Magnetic Track Heads

Designers Can Easily Install Track Heads with a Single Hand While on a Ladder

CHICAGO, IL, UNITED STATES, March 16, 2022 /EINPresswire.com/ -- [PureEdge Lighting](#) introduces 2-Circuit TruTrack® Magnetic with Tubo Zoom Magnetic Track Heads. This innovative version of PureEdge's classic TruTrack plaster-in recessed lighting system allows designers to easily attach track heads using a single hand while on a ladder. The magnetic track head connectors simply click into place inside the track channel and can easily be re-positioned and moved.

Cross Section of how TruTrack Magnetic Installs into 5/8" Drywall

Our patented [TruTrack Magnetic](#) is a modern, 2-circuit track lighting system that recesses into 5/8" drywall for a clean look. This 24VDC two circuit track system allows for two groups of fixtures to switch and dim independently. Only as thick as the 5/8" drywall, the TruTrack patented design is precision engineered to blend seamlessly within drywall surfaces, eliminating the need for joist modification, and provides more flexibility to make turns along the ceiling. The Tubo Zoom Magnetic track heads allow the user to adjust the beam spread from wide to narrow by rotating the lens.

"Having worked with track lighting for over 30 years, and hearing how cumbersome it can be installing track heads, I decided to engineer a magnetic channel and track head magnetic connectors to make it easy for designers to create the perfect room lighting" said Gregory Kay, Owner and CEO of PureEdge Lighting. "Our Tubo Zoom Magnetic track heads can be easily moved, tilted, and adjusted with a single hand while on a ladder. It doesn't get any easier to light art on the walls, furniture, and architectural elements within the space. I think our TruTrack Magnetic recessed lighting system possesses all the great attributes of TruTrack with the added benefit of a simplified click-in-place magnetic connection system."
