EPM systems provide a simplified business process that eliminates the risk of manual errors and allows key decision-makers in the organization to respond more quickly. Business process automation provides real-time information on business requirements. North America is one of the world's most technologically advanced regions. It includes the U.S. and Canada, which have the largest share of the enterprise performance management market due to their early adoption of business technological solutions. Furthermore, North American manufacturing industries are utilizing AI, IoT, and other technological platforms to perform day-to-day business activities in order to increase business productivity. For instance, the companies such as Johnson & Johnson, Roche, and Hulu have automated their business processes by using tools such as Luminoso, Culture Amp etc. to expand their global teams.
