Growth of the food & beverage industry is majorly attributed to rising global population, substantially growing demand for food, rise in agricultural activities around the world, and increasing sales of packaged and processed foods. Industry revenue growth is further driven by factors such as surging demand for organic food products, increasing demand for natural food ingredients and additives, and rise in imports & exports of food & beverages worldwide. Technological advancements in food processing and packaging solutions, increasing number of online food delivery businesses, and rising disposable incomes of consumers around the world factors further contributing to the growth of this industry.
