

Sporting And Athletic Goods Market Growth Is Significantly Impacted By Stable Economic Growth

The Business Research Company's Sporting And Athletic Goods Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026

LONDON, GREATER LONDON, UK, March 17, 2022 /EINPresswire.com/ -- The [sporting and athletic goods manufacturing market](#) is expected to benefit from steady economic growth forecasted for many developed and developing countries. The International Monetary Fund (IMF) stated that the global GDP growth was 3.3% in 2020 and 3.4% in 2021. Recovering commodity prices, after a decline in the historic period is further expected to be a significant factor driving economic growth. The US economy is expected to register stable growth during the forecast period. Additionally, emerging markets are expected to continue to grow slightly faster than the developed markets in the forecast period. Greater economic growth is likely to drive public and private investments, joint ventures, foreign direct investments in the end-user markets, thereby driving the sporting and athletic goods market growth during forecast period.

Additive manufacturing is growing as one of the important sporting and athletic goods market trends as the sports goods industry has become competitive. Additive manufacturing involves

building three dimensional objects using digital models by successively adding multiple layers of material. The sports goods industry has fast-changing customer demands and requirements in product performance. Additive manufacturing enables the manufacturer to fulfil those demands by providing an efficient approach to rapid prototyping. Therefore, a manufacturer can produce a specific design depending upon the individual's prototype. In September 2019, GuardLab, a New York-based sports technology brand partnered with Bauer Hockey, an athletic equipment manufacturer to launch personalized 3D printed mouthguards.
