## Market Overview:

Electric vehicles are the future of the automotive industry. Despite the worldwide economic crisis caused by the epidemic, it looks that the future of electric transportation is brighter than ever. During the COVID-19 crisis, global auto sales plummeted, yet the electric mobility business in several countries remained remarkably robust. The global light vehicle (LV) industry has unquestionably been influenced by the 2020 pandemic, and long-term market dynamics in automotive sales predict that the global electric vehicle (EV) market will recover faster, particularly in China and Europe, where substantial growth is projected post-pandemic. Many automakers are prioritizing EV production lines as they prepare to ramp up production in order
