The Australia balustrade market has witnessed significant growth over the past decade, owing to rise in urbanization in developing countries, increase in spending on home remodeling, and recovery in the construction sector. A number of players in the balustrade industry are expanding their business to strengthen their foothold in the market. By railing type, the interior railing segment dominated the Australia balustrade market in 2019, in terms of revenue. This is

attributed to increase in spending in the residential construction industry

However, owing to the coronavirus situation, various balustrade manufacturers in Australia stopped their business production due to lockdown implemented in the country. This break directly impacted the sales of balustrade companies. In addition, lack of manpower and raw materials halted the supply of balustrade. However, reopening of production facilities and introduction of vaccines for coronavirus disease are anticipated to lead to re-opening of balustrade companies.

By material type, the glass segment dominated the Australia balustrade market in 2019, in terms of revenue, accounting for around 4.9% share of the industry, followed by stainless steel, and aluminum. Moreover, the residential segment is witnessing high CAGR, owing to urbanization, increase in spending for house remodeling, and ease in installation. The favorable government policies to promote residential and commercial sector drives the demand for balustrade. In addition, increase in infrastructure spending and replacement of old buildings & structure propels the demand for balustrade. Furthermore, based on railing type, the exterior railing segment is anticipated to experience rapid growth during the forecast period, due to rise in investments in development of commercial infrastructures in Australia.
