

Steady Growth of the Aerospace & Defense Industry to Fuel Sales of High Temperature Coatings – Fact.MR Survey

High Temperature Coatings Market By Application, By Resin Type & Region - Forecast to 2021-2031

DUBLIN, IRELAND, March 21, 2022 /EINPresswire.com/ -- 250 Pages High Temperature Coatings Market Survey by Fact MR, A Leading Business and Competitive Intelligence Provider

Latest industry survey by Fact MR, predicts [sales of High Temperature Coatings](#) to swell at propelled CAGR through 2031, as chemical and materials sales gradually recover post disruptions caused by COVID-19. The report is aimed at furnishing insights into hidden growth opportunities and challenges. It also provides recommendations to aid businesses prep for unforeseen challenges.

The market intelligence study therefore includes demographics analysis so market players can plan their product and marketing strategy. It offers sales outlook in 20+ countries. It identifies the most lucrative segments to assist companies in creating winning strategies for future.

To remain 'ahead' of your competitors, request for a sample – https://www.factmr.com/connectus/sample?flag=S&rep_id=5532

The report offers actionable and valuable market insights of High Temperature Coatings. The latest report by Fact.MR provides details on the present scenario of the market across various regions along with the historic data and forecast of the market. The report also includes information on the sales and [demand of High Temperature Coatings Market](#) across various industries and regions.

The market study done by Fact.MR gives exclusive information about how the market will grow. The study identifies crucial trends that are determining the [growth of High Temperature Coatings market](#). This newly published report sheds light on vital dynamics, such as the drivers, restraints, and opportunities for key market players as well as emerging players associated with the production and supply. The latest report by Fact.MR provides detailed Market Analysis of High Temperature Coatings

This newly published and insightful report sheds light on Market Insights of High Temperature Coatings, key dynamics, their impact on the overall value chain from suppliers to end-users and Growth of High Temperature Coatings Market.

High Temperature Coatings Market Segmentation by Category

- Application

Aerospace & Defense

Automotive

Coil Coatings

Petrochemical

Marine

Metal Processing

Stoves & Grills

Other Applications

- Resin

Epoxy

Silicone

Polyester

Acrylic

Alkyd

Other Resin Types

- Region

North America

Latin America

Europe

Middle East and Africa (MEA)

East Asia

South Asia

Oceania

Key Takeaways from High Temperature Coatings Market Study

- Surge in demand for epoxy high temperature coatings to bolster growth of manufacturers.
- Rise in requirement from aerospace & defense and automotive industries to fuel sales of high temperature coatings.
- China and Japan to remain among the fastest-growing markets.
- Asia Pacific to maintain its lead in the global market, followed by Europe and North America.
- The United States to hold a major share in the North America market.
- Germany remains the epicenter of the high temperature coatings market in Europe.

“With demand from key end-use industries such as automotive, stoves & grills, metal processing, and others skyrocketing, high temperature coating manufacturers are resorting to consolidation as a key for better inventions in order to increase their sales footprint,” says a Fact.MR analyst.

Rise in Demand from Automotive Industry Fuelling Sales

With increase in requirement for automotive and diesel engines to run cleaner and more efficiently than ever before, the need for thermal management and high temperature-resistant coatings is rising rapidly. High temperature coatings are an integral part of the automotive sector, as they are required in various applications such as-

Electrical components which are sensitive to high temperature

Intake manifolds

Exhaust manifolds

Exhaust gaskets

As a result, steady growth of the automotive industry is working in favor of stakeholders in the high temperature coatings industry. According to a report titled “Automotive Industry Spotlight”, published by Select USA, the United States has one of the largest automotive industries in the world, while in 2018, U.S. light vehicle sales reached 17.2 million units. This implies higher demand for high temperature coatings over the coming years.

Report Benefits & Key Questions Answered

- Which are the top companies operating in the high temperature coatings market?

Some of the top companies competing in the global high temperature coatings landscape are Akzo Nobel NV, Aremco Products, Inc., Belzona International Ltd., and The Valspar Corporation.

- Which are some of the lucrative markets for high temperature coatings?

China, The United States, Germany, United Kingdom, Japan, France, Canada, and a few others are lucrative markets for high temperature coatings.

- Which is a highly sought-after resin for high temperature coatings?

Presently, epoxy high temperature coatings are the mostly sought-after in terms of resin, and are expected to keep leading over the forecast period from 2021 to 2031.

- Which are some key applications of high temperature coatings?

Presently, some key industries demanding high temperature coatings are aerospace & defense, automotive, coil coatings, and petrochemicals.

More Valuable Insights on High Temperature Coatings Market

Fact.MR, in its new report, offers an unbiased Market Analysis of High Temperature Coatings, Sales and Demand of High Temperature Coatings, analyzing forecast statistics through 2019 and beyond. The study reveals growth projections on the basis of various criteria.

Explore Fact.MR's Coverage on the Chemicals and Materials Domain:

Bio-succinic Acid Market - <https://www.factmr.com/report/5405/biosuccinic-acid-market>

The covid-19 pandemic had disastrous impact on the global Bio-succinic Acid market. Due to restrictions on transport from region to region, it had adverse consequences on the market. Government initiatives to stop the disease from spreading like lockdown rules had to take place at the cost of a significant down fall of the overall Bio-succinic Acid production.

Surge Suppression IC Market – <https://www.factmr.com/report/surge-suppression-ic-market>

According to the latest study by Fact.MR, surge suppression IC market is expected to grow significantly over the projected forecast period (2021-2031). Increased focus for the security of power supply and expanding interest for utility clients have provided a positive outlook to the suppression IC market

Liquid Propellants Market – <https://www.factmr.com/report/Liquid-Propellants-Market>

The expansion of the rocket propulsion sector is fueled by an increase in the number of space expeditions, high efficiency and technological improvements in the rocket propulsion, due to

which the liquid propellants market is expected to grow at a CAGR of over 7% during the forecast period and demand for the product is set to behold the huge gain.
