

# Proppant Market Share, Growth, Future Trends, Top Key Players and Industry Forecasts 2021 to 2028

*The shale gas segment accounted for the largest revenue share among the application segments in the global market.*

NEW YORK, NEW YORK, UNITED STATES, March 21, 2022  
/EINPresswire.com/ -- The Global [Proppant Market](#) report presents a comprehensive analysis of the

Proppant market by offering valuable insights to assist the businesses and key players in formulating fruitful strategies during the forecast timeline of 2021-2030. The report studies the historical data to provide an assessment of key segments and sub-segments, revenue, industrial chain analysis, and demand and supply data. The report also sheds light on the technological breakthroughs and product advancements happening in the Proppant market. According to the report, the Proppant industry is likely to witness significant growth over the projected timeline.

One of the major growth-inducing drivers in the proppants sector is the increased demand for oil and natural gas in both established and emerging economies. Traditional extraction procedures were previously used to get oil and natural gas. As these resources become scarce, unconventional oil and gas extraction procedures involving the use of proppants to ensure a steady flow of resources have become increasingly popular. Due to the limited availability of conventional oil and gas, as well as their high carbon emissions, unconventional oil, and gas such as shale oil and gas, tight oil and gas, and coalbed methane have grown in popularity. In addition, new techniques like horizontal multistage fracturing are being introduced by manufacturers.

Competitive Landscape:

The report offers a comprehensive overview of the competitive landscape of the market to

Reports And Data

provide an advantage to the reader. This segment focuses on the initiatives and innovations adopted by the key players to gain a strong foothold in the market. The report also sheds light on mergers and acquisitions, joint ventures, collaborations, partnerships, and agreements, among others, to offer a better understanding of the market. The report also offers insights into revenue, gross profit margin, financial standing, market position, product portfolio, and other vital aspects of each player. The report also includes a thorough SWOT analysis and Porter's Five Forces analysis.

Key Players Profiled in the Report are:

Carbo Ceramics Inc., Saint-Gobain Proppants Inc., U.S. Silica Holdings, Inc., Borovichi Refractories Plant, Yixing Orient Petroleum Proppant Co., Ltd., Mineração Curimbaba Ltda., China GengSheng Minerals, Inc., Fairmount Santrol Holdings Inc., Superior Silica Sands LLC, Hi-Crush Inc., Hexion Inc., Unimin Corporation, Preferred Sands LLC, Fores Ltd., Badger Mining Corporation (BMC), Smart Sand Inc., Mississippi Sand LLC, ChangQing Proppant Corporation, Yangquan Changqing Petroleum Proppants Co., Ltd., Eagle Materials Inc.

The Proppant Market Report Offers:

- Deep insights into the Proppant market landscape
- Key details about the regional segmentation of the Proppant market
- Analysis of the crucial market trends with regards to both current and emerging trends
- Comprehensive impact analysis of COVID-19 pandemic on the Proppant industry
- Extensive overview of the key manufacturers and prominent players of the industry
- Comprehensive study of the market segmentation and recent developments

Request customization of the report <https://www.reportsanddata.com/request-customization-form/4951>

The growth of segments allows you to analyze specific pockets of growth and market approaches, as well as establish your main application areas and target market differences.

Based on type

- Frac Sand
- Resin-Coated Proppants
- Ceramic Proppants

Based on application

- Shale Gas
- Tight Gas
- Coalbed Methane
- Others (tight oil, deep gas, and subsea hydrates)

Based on ceramic proppants:

High Strength Ceramic Proppants

Intermediate Strength Ceramic Proppants

Light Weight Ceramic Proppants

Others (ultra-lightweight proppants, ultra-strength proppants, and ultra-conductive proppants)
