The graphic features the BTCC logo (a stylized 'X' icon followed by the text 'BTCC') on a dark blue background. Below the logo, the text 'BTCC is now an official member of the VerifyVASP Alliance.' is written in orange, followed by 'Fully compliant with FATF's Travel Rule in South Korea' in yellow. To the right, there is an illustration of a smartphone displaying a login screen with a checkmark, a shield with a checkmark, and a person in a blue uniform holding a shield. A green checkmark icon is also present above the smartphone.

By joining the VerifyVASP Alliance, BTCC has assured its users that the exchange has met the latest anti-money laundering (AML) regulations and is fully compliant with the Travel Rule that will be enforced in South Korea in March. This is a significant step forward for the exchange and a major benefit for its users as it implies that investors can freely transfer their cryptocurrency between BTCC and other exchanges that meet the regulatory requirements of FATF in South Korea.

Currently, there are only a few leading overseas exchanges that meet FATF's Travel Rule regulations in South Korea. As one of the few platforms that are compliant with the latest regulations, BTCC continues to work towards its vision of making crypto trading reliable and accessible to everyone.

In a time of constant change, there will always be new regulations arising for different countries and regions in the cryptocurrency industry. Always sensitive to the needs of its users, BTCC looks forward to enhancing its cryptocurrency transfer service through collaboration with various organisations for different countries and regions in the future.
