Companies covered: Beekeeper AG, Nudge Corporation, Simpplr Inc., Smarp Oy, SnapComms Inc., Sociabble Inc., Staffbase, theEMPLOYEEapp, Workvivo Limited, Poppulo.

The software usually featured business grade protection over the infrastructure to protect confidential data. It also includes advanced features, such as file transmission protocol, an intranet platform, and voice over internet protocol. The best well-defined examples of communication software are file transfer protocol, messaging software, and email. Call recording, auto receptionist, voicemail, web conferencing, and others are some of the features supported by the communication software.

The increasing penetration of web applications, mobile applications, and SaaS-based solutions in enterprises and the rising demand for advanced employee communication tools for effective and efficient business communication are driving the growth of the [communication software](#)

[market](#). In addition, emergence of technologies such as artificial intelligence and internet of things has led to the advent of smart and intelligent workplaces, thereby fueling the growth of the market.

However, risk to security breach and high software subscription cost are hampering the market growth. Furthermore, the growing demand for end-to-end business process optimization, enhanced operational efficiency, efficient employee interaction, and reduced miscommunication are among the major factors providing lucrative opportunities to the growth of the communication software market.

Increase in the number of smart and connected devices, implementation of cloud computing, and emergence of technologies such as artificial intelligence and internet of things have resulted in the emergence of smart workplaces. Attributed to the increase in penetration of web & mobile applications and software as a service (SaaS) based solutions in companies, the demand for advanced communication tools for effective business communication is rising at a fast pace, which enhances the growth of the communication software market.

Key benefits of the report:

- This study presents analytical depiction of the communication software market along with the current trends and future estimations to determine the imminent investment pockets.
- The report presents information related to key drivers, restraints, and opportunities along with detailed analysis of the communication software market share.
- The current market is quantitatively analyzed from 2021 to 2030 to highlight the market growth scenario.
- Porter's five forces analysis illustrates the potency of buyers & suppliers in the market.
