Reports And Data

emerging trends. The report is well-formulated through extensive research on crucial aspects of the industry and also provides an in-depth assessment of top companies operating in the market. The report also offers details about market trends, market revenue growth, market share, market dynamics, market size, drivers, restraints, growth opportunities among others.

The global mainframes market is expected to reach a substantially large market size in 2027 and register a high CAGR over the forecast period. Industry analysis indicates that the rising demand for mainframes among end-use industries, including BFSI and IT & telecom, is driven by changing market trends, which are expected to support industry growth as well as market growth over the forecast period.

Market Dynamics:

The global Mainframes market is expected to register significant revenue CAGR over the forecast period. The information and communication technology sector comprises various sectors including hardware, software, telecommunications and other services which are widely used in several sectors including agriculture, healthcare, commercial, industrial, pharmaceutical, and BFSI. The global market revenue growth is significantly driven by factors such as rapidly growing industrial and commercial sectors, increasing adoption of digitalization and rapid advancements in ICT sector. Other factors such as high adoption of latest smart devices such as smart phones, mobiles, laptops, computers, increasing investments in the ICT sector, rising demand for high speed internet and high risks of data leakage and data security are expected to fuel global market growth during the forecast period. In addition, rising need for managing large data, and increasing adoption of cloud services and advanced technologies such as IoT and AI are other factors expected to boost market growth going ahead.
