Scientel CEO Norman Kutemperor Delivered Tech Keynote Speech at The Abrahamic Business Circle Let Money Talk Conference

The Abrahamic Business Circle Let Money Talk Expo 2020 Dubai Conference Highlights Technology Economy & Investment at The December Conference Held at Taj Dubai

NOVI, MICHIGAN, UNITED STATES, March 23, 2022 /EINPresswire.com/ -- [The Abrahamic Business Circle](#) in conjunction with the Dubai 2020 Expo holds a series of conferences aimed at Technology, Economic diversity and Investments. The Circle is headed by Dr. Nagel who is a host to many International Dignitaries who routinely attends and participates in these

Norman Kutemperor Delivering Key Note Presentation - Big Data Leaving No Stones Unturned

unique functions. The Dubai 2020 World Expo started on October 1, 2021 and will continue through March 31, 2022 in full participation by 192 countries. One of the major highlights of this expo are the conferences organized by the Abrahamic Business Circle, comprised of a select group of highly esteemed individuals and members.

> "
> It was a privilege to be selected to deliver the first keynote speech of the day at The Abrahamic Business Circle Dubai 2020 expo December conference Let Money Talk in Dubai"
> *Norman Kutemperor*

The December conference, an Investment Summit titled 'Let Money Talk' was held at Taj Dubai Hotel on December 8, 2021. The Circle has the unique privilege of employing and engaging the most wonderfully Talented Staff as well as Board Members who uniquely craft these extremely well organized events. One of the major highlights of the December conferences was the selection of certain select Awardees who have contributed their Talents and Capabilities of Unique Achievements in their respective areas of specialty. Organized with the help of Dubai 2020

Expo and the Prominent Leaders of the UAE/Dubai Community including Dr. Nagel, these awards

served as the highlight of this unique event.

The Circle selected Norman Kutemperor, Founder and CEO of Scientel IT Corp, a Michigan USA Technology Company that specializes in Big Data technologies to be a keynote speaker. Norman Kutemperor was chosen as the 1st Keynote Presenter. Norman Kutemperor presented a session titled 'Big Data - Leaving no Stone Unturned'. Several Dignitaries as well as Ambassadors along with Corporate CEOs and Heads of States attended this unique event which served as the Expo conclusion event for 2021.

About Scientel

Scientel Information Technology, Inc. is a U.S.-based, systems technology company. Scientel also designs/produces highly optimized high end servers, which can be bundled with its "GENSONIX® ENTERPRISE" DBMS software, as a single-source supplier of complete systems for Big Data environments. Scientel also customizes hardware and software for specific applications resulting in higher performance.

Scientel's specialty is advanced NewSQL DBMS design and applications/systems integration for advanced business processes. This includes applications for Big Data, commercial intranets, Supply Chain management, IT consulting, support, etc., along with "beyond mainframe-level" Large Data Warehouse Appliance hardware/systems.

GENSONIX allows very user-friendly data manipulation capabilities found in standard, SQL-based, database management systems, but it goes beyond. It is truly an "ALL-in-One SQL" -- an "All Data Management System" in the form of an ultra-flexible, NewSQL DBMS of perfectly general capabilities and application potentials. It can also function in concert with mainline SQL systems to efficiently handle both structured and unstructured data as a large data warehouse repository. However, it can handle heavy database loads by itself with the aid of the GENSONIX® NSQL©™ query/procedural language. GENSONIX® supports both telnet as well as http interfaces. GENSONIX® is capable of handling trillions of rows/transactions for billions of customers, which is a huge advantage in "truly Big Data" structured applications.

Business customers can take advantage of Scientel's capabilities in advanced Business Intelligence and Data Analytics to grow their business by handling Big Data more cost-effectively and with greater insights to remain competitive. Scientific, government, and similar organizations can use these capabilities to efficiently process Big Data, instead of being swamped by it.
