"We are at the beginning of generational technology and an obvious opportunity for marginalized communities to take advantage of it. I'm excited about building the More Than Us venture studio to ensure that no one is left behind," said keynote speaker Baron Davis, More Than Us (LLC) presented by Baron Davis Enterprises, LLC.

"Over the past few years, having a few clients 'dabbling' in cryptocurrency has turned into a powerful set of tools for entertainers to generate revenue, and engage and grow their fan base. In many cases musicians generated more revenue from NFTs and investing in cryptocurrencies in the past two years than anything else," says Matthew Hoffman, the founder of Trusted Advisor.

The 1-day summit will be hosted in Los Angeles and is dedicated to NFT's, the blockchain and cryptocurrency, specifically focusing on tax and legal implications for artists, understanding ownership rights, risk, protecting digital assets, investment best practices, minting NFTs, revenue generation and more.

Founded in 2020, Matthew Hoffman has worked to build the Trusted Advisor brand with the mission of fostering an exclusive community of entertainment business managers, artist managers, entertainment attorneys and celebrity family offices. These advisors, like their clients, have unique needs from a technology, investment, cybersecurity and risk perspective.

The association is bound together through education initiatives, private meetups and global summits. Trusted Advisor has longstanding partnerships with leading institutions like Signature Bank, Miller Kaplan, Momentous Insurance Brokerage and Bill.com.
