/EINPresswire.com/ -- [The TxBitcoin](#)

[token](#) was created to be used in decentralized marketing and advertising. It acts as a link between clients and the services provided by agencies or website operators. As a result, a successful marketing strategy can be developed.

Advertising projects or advertisements can be purchased directly from the supported exchange via TXB to use the provider's marketing services.

The demand for TXB will rise in tandem with the growth of the TxBitcoin token's customer base. As a result, the token's value will rise.

As a thank you from the company, token holders will receive a HelpKidz Coin in their wallets. This

applies to those who have at least 500 TXB initially, 1,500 TXB later, in their account with a certain retention period of 1 month. After a certain number of transactions have been made, these will be paid to the wallet at regular intervals. The WIN-WIN feature benefits the token holder. However, activation will only take place in the BETA version.

After the targeted and previously communicated purchase of the token, one can advertise or place advertising banners on the TxBitcoin.me website for various services such as the [listing](#)

This token is published as per the basis of the Binance Smart Chain platform and is entirely compliant with the BEP20 standard. It means that the token is compatible with third-party services and gives easy integration.

Current crypto news are gathered from many media such as Youtube, Twitter and feeds on the platform TxBitcoin.me.
