In a related development, Stellar AI Holdings Pte Ltd is extending their offerings, including the Artificial Voice Bot service, to more regions across the Asian continent, including Singapore, Malaysia, Thailand, Philippines, and China.

A recent report by MarketsandMarkets put the global artificial intelligence (AI) market size at \$58.3 billion in 2021, with a projection that it will hit \$309.6 billion by 2026, driven by the growth of data-based AI as well as advancement in deep learning and need to achieve robotic autonomy for enhanced productivity and competitiveness. The AI Voice Bot service from Stellar AI Holdings Pte Ltd helps businesses design voice bots that enable humanized communication between call centres and humans. The AI Voice Bot system delivers an indistinguishable experience, which has endeared Stellar AI to insurance agents, real estate agents, as well as sales teams across all businesses, amidst rave reviews from clients. "Thanks, Dennis and his sales team for the great efforts!!! My agency is doing so much better, even though there is no roadshows for us to engage in, the AI bots totally replaced the prospecting issues we faced! Kudos," said Judith, Financial Adviser Representative.
